| Cash and cash equivalents at beginning of period                     | 1,179.1      | 748.4         |
| Cash and cash equivalents at end of period                           | \$ 1,074.1   | \$ 726.1      |
| Supplemental disclosure of cash flow information:                    |              |               |
| Cash paid during the period for income tax                           | \$ 15.8      | \$ 45.9       |
| Cash paid during the period for interest on long-term debt           | \$ 15.2      | \$ 7.5        |

<sup>(1)</sup> Previously, the effect of all exchange rate movements was disclosed in "effect of exchange rate movements," and for the six months ended June 30, 2010 was reported as \$76.0 million. The above 2010 statements of cash flows have been re-presented to reflect the exchange rate movement on cash and cash equivalents within "effect of exchange rate movements on cash and cash equivalents" and all other exchange rate movements reallocated accordingly.

### NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

#### 1. History and Organization

Aspen Insurance Holdings Limited ("Aspen Holdings") was incorporated on May 23, 2002 and holds subsidiaries that provide insurance and reinsurance on a worldwide basis. Its principal operating subsidiaries are Aspen Insurance UK Limited ("Aspen U.K."), Aspen Insurance Limited ("Aspen Bermuda"), Aspen Specialty Insurance Company ("Aspen Specialty"), Aspen American Insurance Company ("AAIC") and Aspen Underwriting Limited (corporate member of Lloyd's Syndicate 4711, "AUL"), (collectively, the "Operating Subsidiaries").

### 2. Basis of Preparation

The accompanying unaudited condensed consolidated financial statements have been prepared on the basis of generally accepted accounting principles in the United States ("GAAP") for interim financial information and in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Results for the three and six months ended June 30, 2011 are not necessarily indicative of the results that may be expected for the year ended December 31, 2011. The unaudited condensed consolidated financial statements include the accounts of Aspen Holdings and its wholly-owned subsidiaries, which are collectively referred to herein as the "Company." All intercompany transactions and balances have been eliminated on consolidation.

The balance sheet at December 31, 2010 has been derived from the audited consolidated financial statements at that date but does not include all of the information and footnotes required by GAAP for complete financial statements. These unaudited condensed consolidated financial statements and notes thereto should be read in conjunction with the consolidated financial statements and notes thereto for the year ended December 31, 2010 contained in Aspen's Annual Report on Form 10-K filed with the United States Securities and Exchange Commission (File No. 001-31909).

Assumptions and estimates made by management have a significant effect on the amounts reported within the consolidated financial statements. The most significant of these relate to losses and loss adjustment expenses, the value of investments, reinsurance recoverables and the fair value of derivatives. All material assumptions and estimates are regularly reviewed and adjustments made as necessary, but actual results could be significantly different from those expected when the assumptions or estimates were made.

### New Accounting Policies

In December 2010, the Financial Accounting Standards Board ("FASB") issued ASU 2010-28, "When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts." Step 1 requires reporting entities to identify any potential impairments, on either an annual or interim basis, by comparing the estimated fair value of a reporting unit to its carrying value. If the estimated fair value is less than the carrying value and, it is more likely than not that an impairment exists, then the amount of the impairment will be assessed in the updated guidance in Step 2. Evaluating an impairment in Step 2 requires the evaluation of qualitative factors including the factors presented in existing guidance that trigger an interim impairment test of goodwill such as an adverse change in the business climate, unanticipated competition, or the expectation that a reporting unit will be sold or disposed. ASU 2010-28 is effective for annual reporting periods beginning after December 15, 2010. The provisions of the new guidance do not have a material impact on the Company's consolidated financial statements.

### Accounting Pronouncements Not Yet Adopted

In May 2011, the FASB's Emerging Issues Task Force issued ASU 2011-04, "Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs," which emphasizes using the same meaning and disclosures of fair value within the financial statements prepared in accordance with

### NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

U.S. GAAP and IFRSs. This decision would require the Company to disclose additional information about transfers between Level 1 and Level 2 of the fair value hierarchy, additional disclosures for Level 3 fair value measurement including quantitative and qualitative information about significant unobservable inputs and discussions about the sensitivity of these unobservable inputs and a description of the Company's valuation process. ASU 2011-04 is effective for annual reporting periods beginning after December 15, 2011 with early adoption prohibited.

In 2010, the FASB's Emerging Issues Task Force issued ASU 2010-26, "Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts," which requires costs to be incrementally or directly related to the successful acquisition of new or renewal insurance contracts to be capitalized as deferred acquisitions costs. This decision would require us to expense the proportion of our general and administrative deferred acquisition costs which relate to quoted business which does not successfully convert into a policy. We have undertaken a review to quantify the impact of the change. The maximum impact would be if we were required to expense all of the deferred underwriting costs and would result in a \$31.3 million increase in cumulative operating expenses with the charge being spread across the current and prior years. ASU 2010-26 is effective for annual reporting periods beginning after December 15, 2011 and we have not yet adopted this standard.

#### 3. Acquisitions

There were no acquisition-related transactions during the six months ended June 30, 2011.

### 4. Earnings Per Ordinary Share

Basic earnings per ordinary share are calculated by dividing net income available to holders of Aspen's ordinary shares by the weighted average number of ordinary shares outstanding. Diluted earnings per ordinary share are based on the weighted average number of ordinary shares and dilutive potential ordinary shares outstanding during the period of calculation using the treasury stock method. The following table sets forth the computation of basic and diluted earnings per share for the three and six months ended June 30, 2011 and 2010, respectively:

|                                                           | Three Months Ended June 30, |         |           |                  | Six Months Ended June 30, |               |     |           |  |
|-----------------------------------------------------------|-----------------------------|---------|-----------|------------------|---------------------------|---------------|-----|-----------|--|

| Basic weighted average ordinary shares                    | 70,                         | 792,483 | 77        | ,289,082         | 70                        | ,673,175      | 77  | ,341,732  |  |
| Weighted average effect of dilutive securities(1)         | 2,7                         | 776,427 | 3         | 3,438,173        |                           | _             | 3   | 3,364,544 |  |
| Total diluted weighted average ordinary shares            | 73,5                        | 568,910 | 80        | ,727,255         | 70                        | ,673,175      | 80  | ,706,276  |  |
| Earnings/(loss) per ordinary share:                       |                             |         |           |                  |                           |               |     |           |  |
| Basic                                                     | \$                          | 0.06    | \$        | 1.34             | \$                        | (2.16)        | \$  | 1.50      |  |
| Diluted                                                   | \$                          | 0.06    | \$        | 1.28             | \$                        | (2.16)        | \$  | 1.43      |  |

<sup>(1)</sup> The basic and diluted number of ordinary shares for the six months ended June 30, 2011 is the same, as the inclusion of dilutive securities in a loss making period would be anti-dilutive.

### NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Ordinary Share Repurchases. On November 10, 2010, the Company entered into an accelerated share repurchase program with Barclays Capital to repurchase \$184 million of our ordinary shares. As of December 15, 2010, a total of 5,737,449 ordinary shares were received and cancelled. Upon the completion of the contract on March 14, 2011, an additional 542,736 ordinary shares were received and cancelled. A total of 6,280,185 ordinary shares were cancelled under this contract.

On February 16, 2011, an agreement was signed to repurchase 58,310 shares from the Names' Trustee (as defined in Note 12, below). The shares were repurchased on March 10, 2011 and subsequently cancelled.

Dividends. On July 27, 2011, the Company's Board of Directors declared the following quarterly dividends:

|                          | Dividend    | Payable on:     | Record Date:       |
|--------------------------|-------------|-----------------|--------------------|
| Ordinary shares          | \$ 0.15     | August 26, 2011 | August 11, 2011    |
| 5.625% preference shares | \$ 0.703125 | October 1, 2011 | September 15, 2011 |
| 7.401% preference shares | \$0.462563  | October 1, 2011 | September 15, 2011 |

### 5. Segment Reporting

The Company has two reporting business segments: Insurance and Reinsurance. In arriving at these reporting segments, we have considered similarities in economic characteristics, products, customers, distribution and the regulatory environment. Segment profit or loss for each of the Company's operating segments is measured by underwriting profit or loss. Underwriting profit is the sum of net earned premiums, losses and loss expenses, policy acquisition expenses and general and administrative expenses. Underwriting profit or loss provides a basis for management to evaluate the segment's underwriting performance.

*Reinsurance Segment.* Our reinsurance segment consists of property catastrophe reinsurance, other property reinsurance (risk excess, pro rata, risk solutions and facultative), casualty reinsurance (U.S. treaty, international treaty and global facultative) and specialty reinsurance (credit and surety, structured, agriculture and specialty).

Property Catastrophe Reinsurance: Property catastrophe reinsurance is generally written on a treaty excess of loss basis where we provide protection to an insurer for an agreed portion of the total losses from a single event in excess of a specified loss amount. In the event of a loss, most contracts provide for coverage of a second occurrence following the payment of a premium to reinstate the coverage under the contract, which is referred to as a reinstatement premium. The coverage provided under excess of loss reinsurance contracts may be on a worldwide basis or limited in scope to selected regions or geographical areas.

Other Property Reinsurance: Other property reinsurance is written on an excess of loss, pro rata and facultative basis (U.S. and international) and includes our risk solutions business. Treaty excess of loss property treaty reinsurance provides coverage to a reinsured where it experiences a loss in excess of its retention level on a single "risk" basis. A "risk" in this context might mean the insurance coverage on one building or a group of buildings for fire or explosion or the insurance coverage under a single policy which the reinsured treats as a single risk. This line of business is generally less exposed to accumulations of exposures and losses but can still be impacted by natural catastrophes, such as earthquakes and hurricanes.

Our treaty pro rata reinsurance product provides proportional coverage to the reinsured. We share original losses in the same proportion as our share of premium and policy amounts within contractual terms. Pro rata contracts typically involve close client relationships including regular audits of the cedants' data and are written on an excess of loss basis for primary insurers in the U.S. as well as worldwide. This line of business is not typically

# NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

driven by natural perils. Our risk solutions business writes property insurance risks for a select group of U.S. program managers.

Casualty Reinsurance: Casualty reinsurance is written on an excess of loss, pro rata and facultative basis and consists of U.S. treaty, international treaty and casualty facultative. The casualty treaty reinsurance business we write in the U.S. and internationally includes excess of loss and pro rata reinsurance which are applied to portfolios of primary insurance policies. Our U.S. treaty business comprises exposures to workers' compensation (including catastrophe), medical malpractice, general liability, auto liability, professional liability and excess liability including umbrella liability. Our international treaty business reinsures exposures mainly with respect to general liability, auto liability, professional liability, workers' compensation and excess liability. We also write casualty facultative reinsurance, both U.S. and international. Our excess of loss positions come most commonly from layered reinsurance structures with underlying ceding company retentions.

Specialty Reinsurance: Specialty reinsurance is written on an excess of loss and pro rata basis and consists of credit and surety reinsurance, structured risks, agriculture reinsurance and specialty lines (marine, aviation, satellite). Our credit and surety reinsurance business consists of trade credit reinsurance, international surety reinsurance (mainly European, Japanese and Latin American risks and excluding the U.S.) and a political risks reinsurance portfolio. Our agricultural reinsurance business consists of European and Latin American agriculture reinsurance primarily written on a treaty basis covering crop and multi-peril business. Our specialty line of business is composed principally of reinsurance treaties covering interests similar to those underwritten in marine, energy, liability and aviation insurance, as well as contingency, terrorism, nuclear, personal accident and crop reinsurance. We also write satellite insurance and reinsurance.

A very high percentage of the property reinsurance contracts that we write excludes coverage for losses arising from the peril of terrorism. Within the U.S., our reinsurance contracts generally exclude or limit our liability to acts that are certified as "acts of terrorism" by the U.S. Treasury Department under the Terrorism Risk Insurance Act ("TRIA"), the Terrorism Risk Insurance Extension Act of 2005 ("TRIEA") and now the Terrorism Risk Insurance Program Reauthorization Act of 2007 ("TRIPRA") (currently set to expire on December 31, 2014). With respect to casualty reinsurance risks, losses arising from the peril of terrorism that do not involve nuclear, biological or chemical attack are usually covered by our contracts. Such losses relating to commercial lines risks are generally covered on a limited basis; for example, where the covered risks fall below a stated insured value or into classes or categories we deem less likely to be targets of terrorism than others. We have written a limited number of reinsurance contracts in this segment, both on a pro rata and risk excess basis, specifically covering the peril of terrorism. These contracts typically exclude coverage protecting against nuclear, biological or chemical attack.

*Insurance Segment.* Our insurance segment consists of property insurance, casualty insurance, marine, energy and transportation insurance and financial and professional lines insurance.

*Property Insurance:* Our property insurance line comprises U.K. commercial property and construction and U.S. commercial property (excess and surplus lines basis), written on a primary, excess, quota share and facultative basis. In 2010, we established Aspen Risk Management Limited ("ARML"), which primarily distributes U.K. regional commercial property and liability business.

- U.S. Property: The U.S. commercial property insurance team covers mercantile, manufacturing, municipal and commercial real estate business.
- *U.K. Property:* The U.K. commercial property insurance team provides physical damage and business interruption coverage as a result of weather, fire, theft and other causes. Our client base is predominantly U.K. institutional property owners, middle market corporate and public sector clients.

### NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Casualty Insurance: Our casualty insurance line comprises U.K. commercial liability, global excess casualty and U.S. casualty insurance, written on a primary, quota share and facultative basis. In 2010, we significantly reduced the amount of contractor business written in the U.S.

- U.K. Commercial Liability: The U.K. commercial liability team provides employers' liability coverage and public liability coverage for insureds domiciled in the U.K. and Ireland.
- Global Excess Casualty: The global excess casualty line writes large, sophisticated and risk-managed insureds worldwide and
  covers broad-based risks at high attachment points, including general liability, commercial and residential construction liability,
  life science, railroads, trucking, product and public liability and associated types of cover found in general liability policies in
  the global insurance market.
- U.S. Casualty: The U.S. casualty account primarily consists of lines written within the general liability and umbrella liability insurance segments. Coverage on our general liability line is offered on those risks that are primarily miscellaneous, products liability, contractors (general contractors and artisans), real estate and retail risks and other general liability business.

Marine, Energy and Transportation Insurance: Our marine, energy and transportation insurance line comprises marine, energy and construction ("M.E.C.") liability, energy physical damage, marine hull, specie, U.S. inland marine, ocean risks and aviation, written on a primary, quota share and facultative basis.

- M.E.C. Liability: The M.E.C. liability business includes marine liability cover mainly related to the liabilities of ship-owners
  and port operators, including reinsurance of Protection and Indemnity Clubs ("P&I Clubs"). It also provides liability cover for
  companies in the oil and gas sector, both onshore and offshore and in the power generation and U.S. commercial construction
  sectors.
- Energy Physical Damage: Energy physical damage provides insurance cover against physical damage losses in addition to Operators Extra Expenses ("OEE") for companies operating in the oil and gas exploration and production sector.
- Marine Hull: The marine hull team insures physical damage for ships (including war and associated perils) and related marine assets
- Specie: The specie business line focuses on the insurance of high value property items on an all risks basis, including fine art, general and bank related specie, jewelers' block and armored car.
- Aviation: The aviation team writes physical damage insurance on hulls and spares (including war and associated perils) and
  comprehensive legal liability for airlines, smaller operators of airline equipment, airports and associated business and non-critical
  component part manufacturers. We also provide aviation hull deductible cover.
- Inland Marine and Ocean Risks: The inland marine and ocean cargo team writes business principally covering builder's construction risk, contractor's equipment, transportation and ocean cargo risks in addition to exhibition, fine arts and museums insurance.

Financial and Professional Lines Insurance: Our financial and professional lines comprise financial institutions, professional liability (including management and technology liability) and financial and political risks, written on a primary, quota share and facultative basis.

Financial Institutions: Our financial institutions business is written on both a primary and excess of loss basis and consists of
professional liability, crime insurance and directors' and officers' ("D&O") cover, with the largest exposure comprising risks
headquartered in the U.K., followed by Australia and the U.S. and then Canada and Western Europe. We cover financial
institutions including commercial and investment banks, asset managers, insurance companies, stockbrokers and insureds with
hybrid business models.

# NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

- Professional Liability: Our professional liability business is written out of the U.S. (including Errors and Omissions
  ("E&O")) and the U.K. and is written on both a primary and excess of loss basis. The U.K. team focuses on risks in the U.K.
  with some Australian and European business while the U.S. team focuses on the U.S. and Canada. We insure a wide range of
  professions including lawyers, surveyors, accountants, architects and engineers.
- Management & Technology Liability: We write on both a primary and excess basis D&O insurance, technology-related policies in the areas of network privacy, misuse of data and cyber liability and warranty and indemnity insurance in connection with, or to facilitate, corporate transactions.
- Financial and Political Risks: The financial and political risks team writes business covering the credit/default risk on a variety of project and trade transactions, as well as political risks, terrorism (including multi-year war on land cover), piracy and kidnap and ransom ("K&R"). We write financial and political risks worldwide but with concentrations in a number of countries, such as China, Egypt, Kazakhstan, Russia, South Korea, Switzerland, U.K. and Turkey.
- U.S. Surety Risks: Our surety business writes commercial surety risks including, but not limited to, Federal and Public official bonds, license and permits and fiduciary and miscellaneous bonds, focused on Fortune 1000 companies and large, privately owned companies in the U.S.

Non-underwriting Disclosures. We have provided additional disclosures for corporate and other (non-underwriting) income and expenses. Corporate and other includes net investment income, net realized and unrealized investment gains or losses, corporate expense, interest expense, net realized and unrealized foreign exchange gains or losses and income taxes, which are not allocated to the underwriting segments. Corporate expenses are not allocated to the Company's operating segments as they typically do not fluctuate with the levels of premiums written and are not directly related to our operations. They include group executive costs, group finance, legal and actuarial costs, non-underwriting share-based compensation and certain strategic costs including new teams which have not commenced underwriting.

We do not allocate our assets by segment as we evaluate underwriting results of each segment separately from the results of our investment portfolio. Segment profit or loss for each of the Company's operating segments is measured by underwriting profit or loss. Underwriting profit or loss provides a basis for management to evaluate the segment's underwriting performance.

# NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The following table provides the contractual maturity distribution of our available for sale fixed income investments as at June 30, 2011 and December 31, 2010. Actual maturities may differ from contractual maturities because issuers of securities may have the right to call or prepay obligations with or without call or prepayment penalties.

| Total                                                 | \$688.4                 | \$ (9.8)                    | \$ 7.5                  | \$ —                                   | \$695.9                 | \$ (9.8)                    | 243                     |  |  |  |  |

Other-than-temporary impairments ("OTTI"). The Company recorded OTTI charges for the three and six months ended June 30, 2011 of \$Nil (2010 — \$Nil) and \$Nil (2010 — \$0.3 million), respectively. The Company reviews its available for sale investment portfolio on an individual security basis for potential impairment each quarter based on criteria including issuer-specific circumstances, credit ratings actions and general macro-economic conditions. The difference between the amortized cost/cost and the estimated fair market value of available for sale investments is monitored to determine whether any investment has experienced a decline in value that is believed to be other-than-temporary. A security is impaired when the fair value is below its amortized cost/cost.

In our review of fixed maturity investments, other-than-temporary impairment is deemed to occur when there is no objective evidence to support recovery in value of a security and a) we intend to sell the security or more likely than not will be required to sell the security before recovery of its adjusted amortized cost basis or b) it is deemed probable that we will be unable to collect all amounts due according to the contractual terms of the individual security. In the first case, the entire unrealized loss position is taken as an OTTI charge to realized losses in earnings. In the second case, the unrealized loss is separated into the amount related to credit loss and the amount related to all other factors. The OTTI charge related to credit loss is recognized in realized losses in earnings and the amount related to all other factors is recognized in other comprehensive income. The cost basis of the investment is reduced accordingly and no adjustments are made for subsequent recoveries in value.

Equity securities do not have a maturity date and therefore our review of these securities utilizes a higher degree of judgment. In our review we consider our ability and intent to hold an impaired equity security for a reasonable period of time to allow for a full recovery. Where a security is considered to be other-than-temporarily impaired, the entire charge is recognized in realized losses in earnings. Again, the cost basis of the investment is reduced accordingly and no adjustments are made for subsequent recoveries in value.

### NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Although we review each security on a case by case basis, we have also established parameters to help identify securities in an unrealized loss position which are other-than-temporarily impaired. These parameters focus on the extent and duration of the impairment and for both fixed maturities and equities we consider declines in value of greater than 20% for 12 consecutive months to indicate that the security may be other-than-temporarily impaired.

*U.S. Government and Agency Securities.* U.S. government and agency securities consist primarily of bonds issued by the U.S. Treasury and corporate debt issued by agencies such as the Government National Mortgage Association ("GNMA"), Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation and the Federal Home Loan Bank.

Corporate Securities. Corporate securities are composed of short-term, medium-term and long-term debt issued by corporations and supra-national securities.

Foreign Government. Foreign government securities are composed of bonds issued and guaranteed by foreign governments such as the U.K., Canada, and France.

Municipals. Municipal securities are composed of bonds issued by U.S. municipalities.

Asset-Backed Securities. Asset-backed securities are securities backed by notes or receivables against assets other than real estate.

Mortgage-Backed Securities. Mortgage-backed securities are securities that represent ownership in a pool of mortgages. Both principal and income are backed by the group of mortgages in the pool. They include bonds issued by government-sponsored enterprises such as Federal National Mortgage Association, Federal Home Loan Mortgage Corporation, Federal Home Loan Bank and Federal Farm Credit Bank.

Short-Term Investments. Short-term investments comprise highly liquid debt securities with a maturity greater than three months but less than one year from the date of purchase and are held as part of the investment portfolio of the Company. Short-term investments are classified as either trading or available for sale according to the facts and circumstances of the investment held, and carried at estimated fair value.

*Equity Securities*. Equity securities are comprised of U.S. and Foreign Equity securities and are classified as available for sale. The portfolio invests in high quality global equity securities with attractive dividend yields.

Other Investments. On May 19, 2009, Aspen Holdings invested \$25.0 million in Cartesian Iris 2009A L.P. through our whollyowned subsidiary, Acorn Limited. Cartesian Iris 2009A L.P. is a Delaware Limited Partnership formed to provide capital to Iris Re, a Class 3 Bermudian reinsurer focusing on insurance-linked securities. On June 1, 2010, the investment in Cartesian Iris 2009A L.P. matured and was reinvested in the Cartesian Iris Offshore Fund L.P. The Company's involvement with Cartesian Iris Offshore Fund L.P. is limited to its investment in the fund, and it is not committed to making further investments in Cartesian Iris Offshore Fund L.P.; accordingly, the carrying value of the investment represents the Company's maximum exposure to a loss as a result of its involvement with the partnership at each balance sheet date.

In addition to returns on its investment, the Company provides services on risk selection, pricing and portfolio design in return for a percentage of profits from Iris Re. In the three and six months ended June 30, 2011, fees of \$Nil (2010 — \$Nil) and \$Nil (2010 — \$0.2 million), respectively, were payable to the Company.

The Company has determined that each of Cartesian Iris 2009A L.P. and Cartesian Iris Offshore Fund L.P. has the characteristics of a variable interest entity that are addressed by the guidance in ASC 810, *Consolidation*. Neither Cartesian Iris 2009A L.P. nor Cartesian Iris Offshore Fund L.P. is consolidated by the Company. The Company has no decision-making power, those powers having been reserved for the general partner. The arrangement with Cartesian Iris Offshore Fund L.P. is simply that of an investee to which the Company provides additional services, including the secondment of an employee working under the direction of the board of Iris Re.

### NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The Company has accounted for its investments in Cartesian Iris 2009A L.P. and Cartesian Offshore Fund L.P. in accordance with the equity method of accounting. Adjustments to the carrying value of this investment are made based on our share of capital including our share of income and expenses, which is provided in the quarterly management accounts of the partnership. The adjusted carrying value approximates fair value. In the three and six months ended June 30, 2011, our share of gains and losses decreased the value of our investment by \$0.1 million (2010 — \$0.3 million increase) and \$Nil (2010 — \$0.5 million increase), respectively. The change in value has been recognized in realized and unrealized investment gains and losses in the unaudited condensed consolidated statement of operations.

The tables below show our other investments for the six months ended June 30, 2011 and twelve months ended December 31, 2010:

#### 7. Fair Value Measurements

Fair Value Measurements. Our estimates of fair value for financial assets and liabilities are based on the framework established in the fair value accounting guidance included in ASC Topic 820, Fair Value Measurements and Disclosures. The framework prioritizes the inputs, which refer broadly to assumptions market participants would use in pricing an asset or liability, into three levels, which are described in more detail below.

- Level 1 Valuations based on unadjusted quoted prices in active markets, to which the Company has access, for identical
  assets or liabilities.
- Level 2 Valuations based on inputs other than unadjusted quoted prices in active markets for identical assets or liabilities. Inputs include quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in inactive markets, and inputs other than quoted prices which are directly or indirectly observable for the asset or liability (for example interest rates, yield curves, prepayment speeds, default rates, loss severities).
- Level 3 Valuations based on inputs that are unobservable and significant to the overall fair value measurement. Unobservable inputs reflect the Company's own views about the assumptions that market participants would use in pricing the asset or liability.

Where inputs to the valuation of an asset or liability fall into more than one level of the fair value hierarchy, the classification of the asset or liability will be within the lowest level identified as significant to the valuation.

Our fixed income securities are traded on the over-the-counter market, based on prices provided by one or more market makers in each security. Securities such as U.S. Government, U.S. Agency, Foreign Government and investment grade corporate bonds have multiple market makers in addition to readily observable market value indicators such as expected credit spread, except for Treasury securities, over the yield curve. We use a variety of pricing sources to value our fixed income securities including those securities that have pay down/prepay features such as mortgage-backed securities and asset-backed securities in order to ensure fair and accurate pricing. The fair value estimates for the investment grade securities in our portfolio do not use significant unobservable inputs or modeling techniques.

Equity securities include U.S. and foreign common stocks which are classified as available for sale and carried at fair value. These securities are classified within Level 1 as their fair values are based on quoted market prices in active markets from independent pricing sources.

# NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The following tables present our assets measured at fair value on a recurring basis within the fair value hierarchy at June 30, 2011 and December 31, 2010.

|                                                                 |           | As at June  | 30, 2011    |            |

Fixed income maturities classified as Level 3 at December 31, 2010, related to securities of Lehman Brothers Holdings, Inc. ("Lehman Brothers") which were subsequently sold in the first quarter of 2011. Although the market value of Lehman Brothers bonds was based on broker-dealer quoted prices, management believed the valuation to be based, in part, on market expectations of future recoveries out of bankruptcy proceedings, which involved significant unobservable inputs to the valuation. Derivatives at fair value consist of the interest-rate swaps and the forward exchange contracts as described in Note 9.

### NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

There were no transactions during the three and six months ended June 30, 2011.

### 8. Reinsurance

We purchase retrocession and reinsurance to limit and diversify the Company's risk exposure and to increase its own insurance underwriting capacity. These agreements provide for recovery of a portion of losses and loss adjustment expenses from reinsurers. As is the case with most reinsurance treaties, the Company remains liable to the extent that reinsurers do not meet their obligations under these agreements, and therefore, in line with its risk management objectives, the Company evaluates the financial condition of its reinsurers and monitor concentrations of credit risk.

Balances pertaining to reinsurance transactions are reported "gross" on the consolidated balance sheet, meaning that reinsurance recoverables on unpaid losses and ceded unearned premiums are not deducted from insurance reserves but are recorded as assets.

The largest concentrations of reinsurance recoverables as at June 30, 2011, were with Lloyd's on Lloyd's syndicates which are all rated A (Excellent) by A.M. Best and A+ (Strong) by S&P and with Munich Re which is rated A+ (Superior) by A.M. Best and AA- (Very Strong) by S&P, for their financial strength. Balances with Lloyd's and Munich Re represented 26.1% and 12.2%, respectively, of reinsurance recoverables (December 31, 2010 — 33.2% and 13.2%).

#### 9. Derivative Contracts

The following tables summarize information on the location and amounts of derivative fair values on the consolidated balance sheet as at June 30, 2011 and December 31, 2010:

|                                       |                           | As at June  | 30, 2011  | As at Dece | mber 31, 2010 |

<sup>(1)</sup> The changes in fair value for forward exchange contracts for the three and six months ended June 30, 2011 are included in changes in fair value of derivatives to be consistent with the treatment for other derivative contracts.

Change in Fair Value of Derivatives

\$ (25.4)

(0.1)

Credit Insurance Contract. On November 28, 2006, the Company entered into a credit insurance contract which, subject to its terms, insured the Company against losses due to the inability of one or more of our reinsurance counterparties to meet their financial obligations to the Company. The Company considered the contract to be a derivative instrument because the final settlement was expected to take place two years after expiry of cover and included an amount attributable to outstanding and incurred but not reported ("IBNR") claims which may not at that point in time be due and payable to the Company. The contract was treated as an asset or a liability and measured at the directors' estimate of fair value.

The contract was for five years and provided 90% cover for a named panel of reinsurers up to individual defined sub-limits. The contract did allow, subject to certain conditions, for substitution and replacement of panel members if the Company's panel of reinsurers changes. Payments were made on a quarterly basis throughout the period of the contract based on the aggregate limit, which was set initially at \$477.0 million but was subject to adjustment. On October 26, 2010, we gave notice of our intention to cancel our credit insurance contract with effect from November 28, 2010. The notice of cancellation triggered a final payment of \$1.9 million to the contract counter-parties.

Foreign Exchange Contracts. The Company uses forward exchange contracts to manage foreign currency risk. A forward foreign currency exchange contract involves an obligation to purchase or sell a specified currency at a future date at a price set at the time of the contract. Foreign currency exchange contracts will not eliminate fluctuations in the value of our assets and liabilities denominated in foreign currencies but rather allow us to establish a rate of exchange for a future point in time. The increase in the number of contracts purchased in the first six months of 2011 compared to the first six months of 2010 is due to hedging against foreign currency losses from the earthquakes in New Zealand and Japan. The foreign currency contracts are recorded as derivatives at fair value with changes recorded as a net foreign exchange gain or loss in the Company's statement of operations. As at

### NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

June 30, 2011, the Company had five forward contracts outstanding, resulting in a gain for the three months of \$3.2 million (2010 — two contracts with a gain of \$1.2 million).

Interest Rate Swaps. As at June 30, 2011, the Company held a number of standard fixed for floating interest rate swaps with a total notional amount of \$1.0 billion that are due to mature between August 2, 2012 and November 9, 2020. The swaps are used in the ordinary course of the Company's investment activities to partially mitigate the negative impact of rises in interest rates on the market value of the Company's fixed income portfolio. For the three and six months ended June 30, 2011, there was a charge in respect of the interest rate swaps of \$25.5 million and \$25.4 million respectively (2010 — \$0.1 million charge for the three and six months) primarily due to falling interest rates and their impact on fixed income valuations and yields.

As at June 30, 2011, cash collateral with a fair value of \$18.9 million has been transferred to our counterparties to support the current valuation of the interest rate swaps. At December 31, 2010, non cash collateral with a fair value of \$7.7 million was transferred by our counterparties. In accordance with FASB ASC 860 Topic Transfers and Servicing, transfers of cash collateral are recorded on the balance sheet within Derivatives at Fair Value, while transfers in respect of non-cash collateral are disclosed but not recorded.

Under the derivative accounting guidance, none of the derivatives described above meets the requirements for hedge accounting. Changes in the estimated fair value were included in the consolidated statement of operations.

### 10. Reserves for Losses and Adjustment Expenses

The following table represents a reconciliation of beginning and ending consolidated loss and loss adjustment expenses ("LAE") reserves for the six months ended June 30, 2011, and twelve months ended December 31, 2010:

|                                                                     | As at<br>June 30, 2011 (\$ in | As at December 31, 2010 millions) |
|---------------------------------------------------------------------|-------------------------------|-----------------------------------|

| Plus reinsurance recoverable on unpaid losses at period end         | 359.3                         | 279.9                             |
| Provision for losses and LAE at June 30, 2011 and December 31, 2010 | \$ 4,391.7                    | \$ 3,820.5                        |

# NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

For the six months ended June 30, 2011, there were reserve releases of \$54.7 million compared to \$15.0 million for the six months ended June 30, 2010 in our estimate of the ultimate claims to be paid in respect of prior accident years. For additional information on our reserve releases, please refer to Management's Discussion and Analysis of Financial Condition and Results of Operations, "Reserves for Losses and Loss Adjustment Expenses." The \$10.9 million net loss and LAE expenses in the six months ended June 30, 2011 (twelve months ended December 31, 2010 — \$35.5 million) relates to the commutation of certain contracts in specialty reinsurance.

### 11. Capital Structure

The following table provides a summary of the Company's authorized and issued share capital at June 30, 2011 and December 31, 2010:

|                                                                                              | As at June 30, 2011 |                           | As at December 31, 2010 |                    |

| Shares in issue at June 30, 2011                                                       | 70,832,530       |

Ordinary Share Repurchases. On November 10, 2010, we entered into an accelerated share repurchase program with Barclays Capital to repurchase \$184 million of our ordinary shares. As of December 15, 2010, a total of 5,737,449 ordinary shares were received and cancelled. Upon completion of the contract on March 14, 2011, an

# NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

additional 542,736 ordinary shares were received and cancelled. A total of 6,280,185 ordinary shares were cancelled under the contract.

On February 16, 2011, an agreement was signed to repurchase 58,310 shares from the Names' Trustee, as defined below. The shares were repurchased on March 10, 2011 and subsequently cancelled.

### 12. Share Based Payments

The Company has issued options and other equity incentives under four arrangements: investor options, employee awards, non-employee director awards and the employee share purchase plans. When options are exercised or other equity awards have vested, new shares are issued as the Company does not currently hold treasury shares. The Company applies a fair value based measurement method and an estimate of future forfeitures in the calculation of the compensation costs of stock options, performance shares and restricted share units.

Investor Options. The investor options were issued on June 21, 2002 to Wellington Investment Holdings (Jersey) Limited ("Wellington Investment") and members of Syndicate 2020 who were not corporate members of Syndicate 2020. The options conferred to the members of Syndicate 2020 are held for their benefit by Appleby Services (Bermuda) Ltd. (formerly Appleby Trust (Bermuda) Limited) ("Names' Trustee"). The subscription price payable under the options is initially £10 and increases by 5% per annum, less any dividends paid. Option holders are not entitled to participate in any dividends prior to exercise and would not rank as a creditor in the event of liquidation. If not exercised, the options will expire on June 21, 2012. During the three and six months ended June 30, 2011, the Names' Trustee exercised 205,955 and 745,778 options on a cash and cashless basis, respectively (2010 — 11,790 and 15,011 options).

Employee and Non-Executive Director Awards. Employee options and other awards are granted under the Aspen 2003 Share Incentive Plan and non-executive director awards are granted under the 2006 Stock Option Plan for Non-Employee Directors.

Stock options are granted with an exercise price equivalent to the fair value of the share on the grant date. The weighted average value at grant date is determined using the Black-Scholes option pricing model. Stock options typically vest over a three-year period with a tenyear contract period (except for options granted in 2007 which have a 7-year exercise period) with vesting dependent on time and performance conditions established at the time of grant. No options were granted in the three and six months ended June 30, 2011 (2010 — Nil); no options were exercised during the three months ended June 30, 2011 (2010 — 146,850) and 9,208 options were exercised during the six months ended June 30, 2011 (2010 — 521,811). Compensation costs credited against income in respect of employee options for the three and six months ended June 30, 2011 were \$Nil (2010 — \$0.8 million and \$0.5 million).

Restricted share units ("RSU's") to employees vest equally over a two or three-year period. Some of the grants vest at year-end, while some other grants vest on the anniversary of the date of grant or when the Compensation Committee of the Board agrees to deliver them. The fair value of the restricted share units is based on the closing price on the date of the grant. The fair value is expensed through the income statement evenly over the vesting period. During the three and six months ended June 30, 2011, the Company granted to employees 24,516 and 129,750 restricted share units, respectively (2010 — 75,701 and 108,455). In the case of non-employee directors, one-twelfth of the RSU's vest on each one month anniversary of the date of grant, with 100% of the RSU's becoming vested on the first anniversary of the date of grant. On February 3, 2011 (with a grant date of February 9, 2011), the Board of Directors approved a total of 23,408 RSU's for the non-employee directors (February 11, 2010 — 28,640) and 16,722 RSU's to the Chairman (February 11, 2010 — 17,902). Compensation costs charged against income in respect of restricted share units for the three and six months ended June 30, 2011 were \$0.7 million and \$3.2 million, respectively (2010 — \$0.8 million and \$1.6 million).

# NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The fair value of performance share awards is based on the value of the average of the high and low of the share price on the date of the grant less a deduction for expected dividends which would not accrue during the vesting period. Performance shares vest over a three or four-year period with shares eligible for vesting dependent on the achievement of performance targets at the end of specified periods as established at the time of grant. Compensation costs charged against income in the three and six months ended June 30, 2011 in respect of performance shares were a charge of \$0.1 million and \$Nil, respectively (2010 — credit of \$0.9 million and a charge of \$2.3 million).

2011 Performance Shares. On February 3 and 4, 2011, the Compensation Committee approved the grant of 853,223 performance shares with a grant date of February 9, 2011. Additional grants of 31,669 and 5,902 performance shares were made on March 21, 2011 and May 2, 2011, respectively (February 11, 2010 — 720,098). The performance shares will be subject to a three-year vesting period with a separate annual Return on Equity ("ROE") test for each year. One-third of the grant will be eligible for vesting each year based on a formula, and will only be issuable at the end of the three-year period. If the ROE achieved in 2011 is less than 6%, then the portion of the performance shares subject to the vesting conditions in such year will be forfeited (i.e. 33.33% of the initial grant). If the ROE achieved in 2011 is between 6% and 11%, then the percentage of the performance shares eligible for vesting will be between 10% and 100% on a straight-line basis. If the ROE achieved in 2011 is between 11% and 21%, then the percentage of the performance shares eligible for vesting will be between 100% and 200% on a straight-line basis. The Compensation Committee will determine the vesting conditions for the 2012 and 2013 portions of the grant in such years taking into consideration the market conditions and the Company's business plans at the commencement of the years concerned. Notwithstanding the vesting criteria for each given year, if in any given year, the shares eligible for vesting are greater than 100% for the portion of such year's grant and the average ROE over such year and the preceding year is less than the average of the minimum vesting thresholds for such year and the preceding year, then only 100% (and no more) of the shares that are eligible for vesting in such year shall vest. If the average ROE over the two years is greater than the average of the minimum vesting thresholds for such year and the preceding year, then there will be no diminution in vesting and the shares eligible for vesting in such year will vest in accordance with the vesting schedule without regard to the average ROE over the two-year period.

Employee Share Purchase Plans. On April 30, 2008, the shareholders of the Company approved the Employee Share Purchase Plan (the "ESPP"), the 2008 Sharesave Scheme and the International Employee Share Purchase Plan, which are implemented by a series of consecutive offering periods as determined by the Board. In respect of the ESPP, employees can save up to \$500 per month over a two-year period, at the end of which they will be eligible to purchase Company shares at a discounted price. In respect of the 2008 Sharesave Scheme, employees can save up to £250 per month over a three-year period, at the end of which they will be eligible to purchase Company shares at a discounted price. The purchase price will be eighty-five percent (85%) of the fair market value of a share on the offering date which may be adjusted upon changes in capitalization of the Company. Under the plan, 19,885 shares and 41,364 shares were issued during the three and six months ended June 30, 2011, respectively (2010 — Nil and Nil). Compensation costs charged against income in the three and six months ended June 30, 2011 in respect of the ESPP were \$0.1 million and \$0.3 million, respectively (2010 — \$Nil and \$0.4 million).

License to use the "Aspen" Trademark. On April 5, 2005, the Company entered into an agreement with Aspen (Actuaries and Pension Consultants) Plc to acquire the right to use the Aspen trademark for a period of 99 years in the United Kingdom. The consideration paid was approximately \$1.6 million. The consideration paid was initially capitalized and recognized as an intangible asset on the Company's balance sheet and was amortized on a straight-line basis over the useful economic life of the trademark which was considered to be 99 years. On November 10, 2009, the Company purchased for approximately \$800 the right to use the Aspen trademark indefinitely from the Capita Group PLC, parent to Capita Hartshead (Actuaries & Pension Consultants) Ltd, formerly known as Aspen (Actuaries & Pension Consultants) Plc.

APJ Transaction. On January 22, 2010, the Company entered into a sale and purchase agreement to purchase APJ Continuation Limited and its subsidiaries ("APJ") for an aggregate consideration of \$4.8 million. The Company closed the transaction on March 22, 2010. The directors of Aspen Holdings have assessed the fair value of the net tangible and financial assets acquired at \$1.2 million. The \$3.6 million intangible asset represents our assessment of the value of renewal rights and distribution channels (\$2.2 million) and the lock-in period for employees associated with the business (\$1.4 million).

U.S. Insurance Company. On February 4, 2010, the Company entered into a stock purchase agreement to purchase a U.S. insurance company, now renamed Aspen American Insurance Company, with licenses to write insurance business on an admitted basis in the U.S. The value of these licenses was \$10.0 million and the Company completed the transaction on August 16, 2010.

# 14. Commitments and Contingencies

# (a) Restricted assets

The Company is obliged by the terms of its contractual obligations to U.S. policyholders and by undertakings to certain regulatory authorities to facilitate the issue of letters of credit or maintain certain balances in trust funds for the benefit of policyholders.

# NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The following table shows the forms of collateral or other security provided to policyholders as at June 30, 2011 and December 31, 2010:

<sup>(1)</sup> As of June 30, 2011, the Company had securities and cash of \$788.9 million and £19.5 million (December 31, 2010 — \$699.9 million and £30.0 million) as collateral for the secured letters of credit.

On April 29, 2009, Aspen Bermuda replaced its existing letter of credit facility with Citibank Europe dated October 29, 2008 in a maximum aggregate amount of up to \$450 million with a new letter of credit facility in a maximum aggregate amount of up to \$550 million. The Company had \$449.2 million of outstanding collateralized letters of credit under this facility at June 30, 2011. Included in outstanding collateralized letters of credit for \$231.7 million provided to AUL as Funds at Lloyd's and described below.

On February 28, 2011, Aspen U.K. and Aspen Bermuda entered into an amendment to the \$200.0 million secured letter of credit facility agreement with Barclays Bank PLC ("Barclays") dated as of October 6, 2009. The amendment extends the maturity date of the credit facility to December 31, 2013. All letters of credit issued under the facility are used to support reinsurance obligations of the parties to the agreement and their respective subsidiaries. The Company had \$119.3 million of outstanding collateralized letters of credit under this facility at June 30, 2011.

On July 31, 2010, Aspen Holdings and its various subsidiaries replaced its then existing \$450.0 million revolving credit facility with a three year \$280.0 million revolving credit facility.

Funds at Lloyd's. AUL operates in Lloyd's as the corporate member for Syndicate 4711. Lloyd's determines Syndicate 4711's required regulatory capital principally based on the syndicate's annual business plan. Such capital, called Funds at Lloyd's, comprises: cash, investments and a fully collateralized letter of credit. The amounts of cash, investments and letter of credit at June 30, 2011 amounted to \$315.6 million (December 31, 2010 — \$230.3 million).

Interest-rate Swaps. As at June 30, 2011, cash collateral with a fair value of \$18.9 million has been transferred to our counterparties to support the current valuation of the interest rate swaps. At December 31, 2010, non cash collateral with a fair value of \$7.7 million was transferred by our counterparties. In accordance with FASB ASC 860 Topic Transfers and Servicing, transfers of cash collateral are recorded on the balance sheet within Derivatives at Fair Value, while transfers in respect of non-cash collateral are disclosed but not recorded.

# (b) Operating leases

Amounts outstanding under operating leases net of subleases as of June 30, 2011 were:

|                             | 2011  | 2012             | 2013  | 2014  | 2015  | Years  | Total  |
|-----------------------------|-------|------------------|-------|-------|-------|--------|--------|
|                             |       | (\$ in millions) |       |       |       |        |        |
| Operating Lease Obligations | \$5.3 | \$10.2           | \$9.4 | \$9.1 | \$8.6 | \$18.4 | \$61.0 |

# NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

## (c) Variable interest entities

Cartesian Iris 2009A L.P and Cartesian Iris Offshore Fund L.P. As disclosed in Note 6, on May 19, 2009, Aspen Holdings invested \$25.0 million in Cartesian Iris 2009A L.P. through our wholly-owned subsidiary, Acorn Limited. Cartesian Iris 2009A L.P. is a Delaware Limited Partnership formed to provide capital to Iris Re, a Class 3 Bermudian reinsurer focusing on insurance-linked securities. On June 1, 2010, the investment in Cartesian Iris 2009A L.P. matured and was reinvested in the Cartesian Iris Offshore Fund L.P. The Company's involvement with Cartesian Iris Offshore Fund L.P. is limited to its investment in the fund, and it is not committed to making further investments in Cartesian Iris Offshore Fund L.P.; accordingly, the carrying value of the investment represents the Company's maximum exposure to a loss as a result of its involvement with the partnership at each balance sheet date.

In addition to returns on its investment, the Company provides services on risk selection, pricing and portfolio design in return for a percentage of profits from Iris Re. In the three and six months ended June 30, 2011, fees of \$Nil (2010—\$Nil) and \$Nil (2010—\$0.2 million), respectively, were payable to the Company.

The Company has determined that each of Cartesian Iris 2009A L.P. and Cartesian Iris Offshore Fund L.P. has the characteristics of a variable interest entity that are addressed by the guidance in ASC 810, *Consolidation*. Neither Cartesian Iris 2009A L.P. nor Cartesian Iris Offshore Fund L.P. is consolidated by the Company. The Company has no decision-making power, those powers having been reserved for the general partner. The arrangement with Cartesian Iris Offshore Fund L.P. is simply that of an investee to which the Company provides additional services, including the secondment of an employee working under the direction of the board of Iris Re.

## 15. Subsequent Events

The Company has considered subsequent events to the date of filing this report.

### Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following is a discussion and analysis of our financial condition and results of operations for the three and six months ended June 30, 2011 and 2010. This discussion and analysis should be read in conjunction with the unaudited condensed consolidated financial statements and related notes contained in this Form 10-Q and the audited consolidated financial statements and related notes for the fiscal year ended December 31, 2010, as well as the discussions of critical accounting policies, contained in our Financial Statements in our 2010 Annual Report on Form 10-K filed with the United States Securities and Exchange Commission.

Some of the information contained in this discussion and analysis or set forth elsewhere in this Form 10-Q, including information with respect to our plans and strategy for our business and in "Outlook and Trends" below, includes forward-looking statements that involve risk and uncertainties. Please see the section captioned "Cautionary Statement Regarding Forward-Looking Statements" in this report and the "Risk Factors" in Item 1A of our 2010 Annual Report on Form 10-K for more information on factors that could cause actual results to differ materially from the results described in or implied by any forward-looking statements contained in this discussion and analysis.

### Overview

We are a Bermuda holding company. We write insurance and reinsurance business through our wholly-owned subsidiaries in three major jurisdictions: Aspen U.K. and AUL, corporate member of Syndicate 4711 at Lloyd's of London (United Kingdom), Aspen Bermuda (Bermuda), Aspen Specialty and AAIC (United States). Aspen U.K. also has branches in Paris, France; Zurich, Switzerland; Dublin, Ireland; Cologne, Germany; Singapore; Australia; and Canada. We operate in global markets for property and casualty insurance and reinsurance.

Highlights of our results for the three and six months ended June 30, 2011 were:

- Diluted book value per share(1) of \$37.43, increased by 1.3% over the end of the second quarter of 2010 and by 2.1% from the end of the first quarter of 2011;
- Second quarter net profit after tax of \$10.2 million, including losses of \$65.0 million, net of reinsurance recoveries, reinstatement premiums and taxes, resulting from the weather-related events in the U.S. that occurred in April and May 2011, decreased from net profit after tax of \$108.9 million in the comparative quarter in 2010;
- Combined ratio of 105.0%, or 89.2% excluding catastrophe losses, compared with a combined ratio of 86.9% for the second quarter of 2010;
- Net income per diluted share of \$0.06 for the quarter, including \$0.89 of loss per share from the natural catastrophe events that occurred in the second quarter of 2011, decreased from net income per diluted share of \$1.28 for the second quarter of 2010; and
- Annualized net income return on average equity(2) of 0.8% for the second quarter of 2011 and an annualized loss on equity of 12.6% for the first half of 2011.

<sup>(1)</sup> Diluted book value per ordinary share is based on total shareholders' equity less preference shares (liquidation preference less issue expenses), divided by the number of diluted ordinary shares at the end of the period.

<sup>(2)</sup> Average equity excludes the average after-tax unrealized appreciation or depreciation on investments, preference shares and average after-tax unrealized foreign exchange gains or losses.

Shareholders' equity and ordinary shares in issue as at June 30, 2011 and June 30, 2010 were:

|                                                  | As at<br>June 30, 2011 |                   | Jur       | As at<br>ne 30, 2010 |

| Total shareholders' equity                       | \$                     | 3,104.6           | \$        | 3,303.9              |
| Preference shares less issue expenses            |                        | (353.6)           |           | (353.6)              |
| Net assets attributable to ordinary shareholders | \$                     | 2,751.0           | \$        | 2,950.3              |
| Ordinary shares                                  |                        | 70,832,530        | 7         | 6,700,990            |
| Diluted ordinary shares                          | 7                      | 3,491,858         | 7         | 9,830,836            |

The following overview of our results for the three months ended June 30, 2011 and 2010 and of our financial condition at June 30, 2011, is intended to identify important trends and should be read in conjunction with the more detailed discussion further below.

Gross written premiums. Total gross written premiums increased by 6.7% in the second quarter of 2011 when compared to 2010 with significant increases in the insurance segment and a modest increase in the reinsurance segment. Gross written premiums in the insurance segment have increased by 12.2% to \$294.2 million when compared to the second quarter of 2010 with the increase largely due to increased demand, particularly in our marine, energy and transportation line and our kidnap and ransom business which forms part of our financial and professional lines insurance. The table below shows our gross written premiums for each segment for the three months ended June 30, 2011 and 2010, and the percentage change in gross written premiums for each segment:

| Business Segment | For the Three Months Ended June 30, 2011 |       |                           |                  | For the Three Months<br>Ended June 30, 2010 |  |  |
|------------------|------------------------------------------|-------|---------------------------|------------------|---------------------------------------------|--|--|
|                  | (\$ in millions)                         |       | % increase/<br>(decrease) | (\$ in millions) |                                             |  |  |
| Reinsurance      | \$                                       | 288.0 | 1.7%                      | \$               | 283.3                                       |  |  |
| Insurance        |                                          | 294.2 | 12.2                      |                  | 262.1                                       |  |  |
| Total            | \$                                       | 582.2 | 6.7%                      | \$               | 545.4                                       |  |  |

Reinsurance ceded. Total reinsurance ceded for the quarter of \$56.5 million has increased by \$49.9 million from the second quarter of 2010. The reinsurance segment has recognized additional costs of catastrophe programs purchased to provide additional cover for the upcoming wind season after the current year's catastrophe events to date while reinsurance costs increased for the insurance segment when compared with the second quarter of 2010 as the prior year included a downward ceded premium adjustment for our marine, energy and transportation lines as we reduced gross exposures in the Gulf of Mexico.

Loss ratio. We monitor the ratio of losses and loss adjustment expenses to net earned premium (the "loss ratio") as a measure of relative underwriting performance where a lower ratio represents a better result than a higher ratio. The loss ratios for our two business segments for the three months ended June 30, 2011 and 2010 were as follows:

|                  | I         | For the Three Months | For the Three Months |
|------------------|-----------|----------------------|----------------------|
| Business Segment | <u>_1</u> | Ended June 30, 2011  | Ended June 30, 2010  |
| Reinsurance      |           | 77.0%                | 50.3%                |
| Insurance        |           | 62.6                 | 69.1                 |
| Total Loss Ratio |           | 71.0%                | 57.7%                |

The loss ratio for the quarter of 71.0% has increased by 13.3 percentage points compared to the second quarter of 2010. The increase is due mainly to losses from the U.S. tornadoes and floods (the "U.S. storms") which occurred in the second quarter. We have included \$79.0 million of pre-tax net losses, before reinstatements, from the U.S. storms while the comparative period did not have any material natural disaster losses. Current year losses were partly offset by \$32.8 million of prior year reserve releases in the current quarter compared with \$2.1 million of reserve releases in the second quarter of 2010. Reserve releases in our reinsurance segment increased from

\$11.1 million in the second quarter of 2010 to \$25.3 million in the current period following favorable development in the property reinsurance and specialty reinsurance lines.

The insurance segment had a \$7.5 million reserve release this quarter compared to a \$9.0 million reserve strengthening in the second quarter of 2010.

We have also presented accident loss ratios excluding the impact from prior year reserve adjustments and catastrophic losses to assist in the analysis of the underlying performance of our segments. We have defined catastrophic losses as: losses associated with the U.S. storms which occurred in the second quarter of 2011; and movements in loss estimates associated with the first quarter 2011 catastrophe events (Australian floods and New Zealand and Japanese earthquakes) that have been recognized in the second quarter of 2011. Catastrophic losses in the comparative period represent movements in the second quarter of 2010 of losses associated with the Chilean earthquake, which occurred in the first quarter of 2010. Our current pre-tax estimate of losses, net of reinstatement premiums, for the second quarter U.S. storms is \$71.8 million. The underlying changes in accident year loss ratios by segment are also shown in the table below. The prior year adjustment in the table below reflects prior-year reserve movement and premium adjustments. The current year adjustments represent catastrophic loss events which reflect net claims and reinstatement premium adjustments.

| For the Three Months Ended June 30, 2011 | Total Loss<br>Ratio | Prior Year<br>Adjustment | Total<br>Accident Year<br>Loss Ratio | Current Year<br>Adjustment | Year Loss<br>Ratio Excluding<br>Prior and<br>Current Year<br>Adjustments |
|------------------------------------------|---------------------|--------------------------|--------------------------------------|----------------------------|--------------------------------------------------------------------------|
| Reinsurance                              | 77.0%               | 10.6%                    | 87.6%                                | (23.6)%                    | 64.0%                                                                    |
| Insurance                                | 62.6                | 2.4                      | 65.0                                 | (4.6)                      | 60.4                                                                     |
| Total                                    | 71.0%               | 7.1%                     | 78.1%                                | (15.6)%                    | 62.5%                                                                    |

Accident

Accident

|                                          | Total Loss | Prior Year | Total<br>Accident Year | Current Year | Year Loss<br>Ratio Excluding<br>Prior and<br>Current Year |
|------------------------------------------|------------|------------|------------------------|--------------|-----------------------------------------------------------|
| For the Three Months Ended June 30, 2010 | Ratio      | Adjustment | Loss Ratio             | Adjustment   | Adjustments                                               |
| Reinsurance                              | 50.3%      | 5.7%       | 56.0%                  | (0.4)%       | 55.6%                                                     |
| Insurance                                | 69.1       | (5.2)      | 63.9                   | _            | 63.9                                                      |
| Total                                    | 57.7%      | 1.5%       | 59.2%                  | (0.3)%       | 58.9%                                                     |

Reserve releases. The loss ratios take into account changes in our assessments of reserves for unpaid claims and loss adjustment expenses arising from earlier years. In the three months ended June 30, 2011 and 2010, we recorded a reduction in the level of reserves for prior years. The amounts of these reductions and their effect on the loss ratio in each period are shown in the following table:

|                                   | For the Three Months<br>Ended June 30, 2011 |                | Three Months<br>une 30, 2010 |
|-----------------------------------|---------------------------------------------|----------------|------------------------------|
| •                                 | Ended                                       | (\$ in million | <br>une 30, 2010             |
| Reserve releases                  | \$                                          | 32.8           | \$<br>2.1                    |
| Percentage of net premiums earned |                                             | 7.1%           | 0.4%                         |

The \$30.7 million variance is mainly due to a \$7.5 million insurance reserve release in the second quarter of 2011 compared to a \$9.0 million strengthening in the second quarter of 2010, which had adverse loss experience in both our professional liability and U.S. casualty accounts. In the current quarter, we have recognized releases from our property and marine, energy and transportation business lines. The reinsurance segment had reserve releases of \$25.3 million, an increase of \$14.2 million from the second quarter of 2010, following favorable development in property reinsurance and specialty reinsurance lines. Further information relating to the movement of prior year reserves can be found below under "Reserves for Loss and Loss Adjustment Expenses."

Expense ratio. We monitor the ratio of expenses to net earned premium (the "expense ratio") as a measure of the cost effectiveness of our policy acquisition, general, administrative and corporate processes. The table below

presents the contribution of the policy acquisition expenses and general, administrative and corporate expenses to the expense ratio and the total expense ratios for each of the three months ended June 30, 2011 and 2010:

|                                                | For the Three Months Ended June 30, 2011 | For the Three Months<br>Ended June 30, 2010 |  |
|------------------------------------------------|------------------------------------------|---------------------------------------------|--|
| Policy acquisition expenses                    | 18.9%                                    | 16.2%                                       |  |
| General, administrative and corporate expenses | 15.1                                     | 13.0                                        |  |
| Expense ratio                                  | 34.0%                                    | 29.2%                                       |  |

The policy acquisition expense ratio of 18.9% for the quarter has increased from 16.2% in the second quarter of 2010. The increase is due to a combination of higher reinsurance costs reducing our net earned premium and a change in the mix of business written where we have written a greater proportion of business which incurs a higher average commission rate.

General, administrative and corporate expenses have increased to \$69.6 million for the quarter compared with \$62.6 million in the second quarter of 2010 with the general, administrative and corporate expense ratio, as a percentage of net earned premium, increasing from 13.0% to 15.1% for the same period. The increase in the general, administrative and corporate expense ratio is mainly due to our purchase of additional reinsurance reducing our net earned premium, while the increase in costs overall is due to our investment in infrastructure and capabilities to support our expansion in the U.K., U.S. and Switzerland.

*Net investment income.* Net investment income for the quarter of \$58.6 million has increased from \$57.5 million in the second quarter of 2010 due to increases in portfolio investments combined with additional income from global equity investments less the impact from lower portfolio book yields.

Change in fair value of derivatives. In the three months ended June 30, 2011, we recorded a loss of \$25.5 million (2010 — \$0.1 million) for the interest rate swaps due to falling interest rates and their impact on fixed income valuations and yields. We also hold five foreign currency contracts with a combined impact on net income for the three months ended June 30, 2011 of a gain of \$3.2 million (2010 — two contracts with a gain of \$1.2 million).

We cancelled our credit insurance contract as of November 28, 2010. In the three months ended June 30, 2010, we recorded a reduction of \$2.0 million in the estimated fair value of the credit insurance contract including an interest expense of \$0.2 million and a charge of \$0.1 million for the interest rate swap. Further information on these contracts can be found in Note 9 to the financial statements.

Other revenues and expenses. Other revenues and expenses in the three months ended June 30, 2011 included \$10.9 million of foreign currency exchange gains (2010 — \$2.6 million loss) and \$9.8 million of realized and unrealized investments gains (2010 — \$5.7 million gain). Realized and unrealized gains included \$6.6 million (2010 — \$3.0 million) of net realized gains from the fixed income maturities available for sale portfolio, \$1.1 million (2010 — \$1.1 million) of net realized gains from our fixed income maturities trading portfolio, \$2.2 million net unrealized gain (2010 — \$1.3 million gain) from our fixed income maturities trading portfolio and a charge of \$0.1 million (2010 — \$0.3 million gain) representing our share of earnings from our investment in Cartesian Iris. We have also recognized \$6.8 million (2010 — income of \$3.7 million) of other income for the three months ended June 30, 2011 which is primarily due to income associated with funds with-held contracts. We had no other-than-temporary impairment charges on our investments in the current or the prior comparative period.

Taxes. The estimated effective rate of tax for the quarter is a 10.5% charge (2010 — 10.0% charge). The effective tax rate for the year is subject to revision in future periods if circumstances change and in particular, depending on the relative claims experience of those parts of business underwritten in Bermuda (where the rate of tax on corporate profits is zero) the U.K. (where corporate tax rate was reduced from 28% to 26% effective April 1, 2011) and the U.S. (where the corporate tax rate is 35%).

Dividends. The dividend on our ordinary shares has been maintained at \$0.15 per ordinary share for the quarter.

Dividends paid on our preference shares in the three months ended June 30, 2011 were \$5.7 million (2010 — \$5.7 million).

Shareholders' equity and financial leverage. Total shareholders' equity increased by \$53.6 million to \$3,104.6 million for the three months ended June 30, 2011. The most significant movements were:

- net unrealized gains on investments, net of taxes, of \$47.6 million; and
- a \$5.9 million reduction in retained earnings for the period, after deducting ordinary dividends of \$10.6 million and preference share dividends of \$5.7 million.

As at June 30, 2011, total ordinary shareholders' equity was \$2,751.0 million compared to \$2,888.3 million at December 31, 2010. The reduction in total ordinary shareholders' equity is largely attributable to a net loss after tax of \$141.5 million (2010 — net profit of \$127.2 million) for the six months ended June 30, 2011. The remainder of our total shareholders' equity, as at June 30, 2011, was funded by two classes of preference shares with a total value as measured by their respective liquidation preferences of \$353.6 million net of share issuance costs (December 31, 2010 — \$353.6 million).

The amount outstanding under our senior notes, less amortization of expenses, of \$498.9 million (December 31, 2010 — \$498.8 million) was the only material debt that we had outstanding as of June 30, 2011 and December 31, 2010.

Management monitors the ratio of debt to total capital, with total capital being defined as shareholders' equity plus outstanding debt. At June 30, 2011, this ratio was 13.8% (December 31, 2010 — 13.3%).

Our preference shares are classified on our balance sheet as equity but may receive a different treatment in some cases under the capital adequacy assessments made by certain rating agencies. Such securities are often referred to as 'hybrids' as they have certain attributes of both debt and equity. We also monitor the ratio of the total of debt and hybrids to total capital which was 23.7% as of June 30, 2011 (December 31, 2010 — 22.8%)

Liquidity. Management monitors the liquidity of Aspen Holdings and of each of its Operating Subsidiaries. With respect to Aspen Holdings, management monitors its ability to service debt, to finance dividend payments and to provide financial support to the Operating Subsidiaries. As at June 30, 2011, Aspen Holdings held \$97.5 million (December 31, 2010 — \$354.0 million) in cash and cash equivalents which, taken together with dividends declared or expected to be declared by subsidiary companies and our credit facilities, management considered sufficient to provide liquidity.

As at June 30, 2011, the Operating Subsidiaries held \$955.2 million (December 31, 2010 — \$772.8 million) in cash and cash equivalents that are readily realizable securities. Management monitors the value, currency and duration of the cash and investments within its Operating Subsidiaries to ensure that they are able to meet their insurance and other liabilities as they become due and was satisfied that there was a comfortable margin of liquidity as at June 30, 2011 and for the foreseeable future.

As of June 30, 2011, we had in issue \$656.6 million in letters of credit to cedants, for which the Company had funds on deposit of \$788.9 million as collateral for the secured letters of credit. Further information relating to letters of credit is found below under "Liquidity."

## **Outlook and Trends**

Reinsurance. Our catastrophe reinsurance business has renewed at improving rates since the Japanese Tohoku earthquake struck in March. There were two major U.S. accounts which renewed prior to Tohoku and the introduction of updated catastrophe models. Excluding these two accounts, we achieved average rate increases of 16% across our entire catastrophe excess of loss accounts. Including these two accounts, we achieved an average 13% increase in rates. In further detail, we achieved average increases of 89% in Australia and New Zealand, 49% in Japan (including temporary extensions) and 18% in Asia excluding Japan. In the U.S., we achieved an average 12% improvement excluding the two major U.S. accounts, and an average 8% increase if they are included. Elsewhere in our catastrophe account, we renewed business with minimal price changes. We achieved these price improvements in part because we did not renew approximately \$100 million of aggregate U.S. wind limit and a further \$80 million

of non-U.S. wind limit where we did not believe the price on offer reflected our current view of risk. Nevertheless, we currently anticipate that we will have the opportunity to increase exposures in 2012 and beyond at better prices.

Market conditions in casualty reinsurance remain challenging although rates have begun to stabilize. Our U.S. casualty reinsurance business experienced very little movement in rates. International casualty reinsurance achieved some rate increases, mainly driven by the Australian account. In our specialty reinsurance lines, we have seen modest improvements in areas of the account impacted by the natural catastrophes in the first quarter with non-U.S. crop broadly flat and single digit rate reductions in credit and surety.

Given the high incidence of natural catastrophes year to date with several months of the U.S. Atlantic hurricane season still to come, we have taken the opportunity to purchase additional limits for wind and earthquake events in the U.S. and Europe as well as additional cover for non-peak catastrophe perils.

Insurance. Our marine, energy and construction liability account experienced a notable change in part due to the impact of the Deepwater Horizon loss last year and we were able to take advantage of the increased pricing momentum resulting in the achievement of an average rate increase of 22% on our book year to date. In aviation, pricing remained broadly flat but with some downward pressure on war classes. The energy physical damage market has been impacted by a significant market loss with the sinking of the Gryphon drill-ship in the North Sea in February but we are not yet seeing this reflected in improved pricing.

### **Application of Critical Accounting Policies**

Our condensed consolidated financial statements are based on the selection of accounting policies and the application of significant accounting estimates, which require management to make significant estimates and assumptions. We believe that some of the more critical judgments in the areas of accounting estimates and assumptions that affect our financial condition and results of operations are related to reserves for property and liability losses, premiums receivable in respect of assumed reinsurance, the fair value of derivatives and the value of investments, including the extent of any other-than-temporary impairment. For a detailed discussion of our critical accounting policies please refer to our 2010 Annual Report on Form 10-K filed with the United States Securities and Exchange Commission and the notes to the financial statements contained in this report.

We have discussed the application of these critical accounting estimates with our Board of Directors and Audit Committee.

# Results of Operations for the Three Months Ended June 30, 2011 Compared to the Three Months Ended June 30, 2010

The following is a discussion and analysis of our consolidated results of operations for the three months ended June 30, 2011 and 2010 starting with a discussion of segmental results and then summarizing our consolidated results under "Total Income Statement — Second Quarter" below.

# **Underwriting Results by Operating Segments**

We are organized into two business segments: Reinsurance and Insurance. We have considered similarities in economic characteristics, products, customers, distribution, the regulatory environment of our operating segments and quantitative thresholds to determine our reportable segments. The reinsurance segment consists of property catastrophe reinsurance, other property reinsurance, casualty reinsurance and specialty reinsurance. The insurance segment consists of property insurance, casualty insurance, marine, energy and transportation insurance and financial and professional lines insurance.

Management measures segment results on the basis of the combined ratio, which is obtained by dividing the sum of the losses and loss expenses, acquisition expenses and general and administrative expenses by net premiums earned. Other than corporate expenses, indirect general and administrative expenses are allocated to segments based on each segment's proportional share of gross earned premiums.

We have provided additional disclosures for corporate and other (non-underwriting) income and expenses in Note 5 of our unaudited financial statements. Corporate and other income includes net investment income, net

realized and unrealized investment gains or losses, corporate expense, interest expense, net realized and unrealized foreign exchange gains or losses and income taxes, which are not allocated to the underwriting segments.

Please refer to the tables in Note 5 in our unaudited financial statements of this report for a summary of gross and net written and earned premiums, underwriting results and combined ratios and reserves for our two business segments for the three months ended June 30, 2011 and 2010. The contributions of each segment to gross written premiums in the three months ended June 30, 2011 and 2010 were as follows:

|                  | Gross Written Premiums |                      |  |  |  |
|------------------|------------------------|----------------------|--|--|--|
|                  | For the Three Months   | For the Three Months |  |  |  |

## Reinsurance

Our reinsurance segment consists of property catastrophe reinsurance, other property reinsurance (risk excess, pro rata, risk solutions and facultative), casualty reinsurance (U.S. treaty, international treaty, and global facultative) and specialty reinsurance (credit and surety, structured, agriculture and specialty). Please see Note 5 to the financial statements for further descriptions of the lines of business within this segment.

Gross written premiums. Gross written premiums in our reinsurance segment increased by 1.7% compared to the three months ended June 30, 2010. The increase in gross written premiums has come mainly from specialty reinsurance business and in particular structured risks, where we recognized loss related additional premiums and growth in our non-U.S. crop and credit and surety business lines. The increase was offset by reductions in casualty and other property reinsurance where we are seeing challenging market conditions and prices that do not meet our profitability requirements.

The table below shows our gross written premiums for each line of business for the three months ended June 30, 2011 and 2010, and the percentage change in gross written premiums for each such line:

|                                  | Gross Written Premiums |                             |                                             |    |                  |  |  |
|----------------------------------|------------------------|-----------------------------|---------------------------------------------|----|------------------|--|--|

| Casualty reinsurance             |                        | 44.6                        | (13.4)                                      |    | 51.5             |  |  |
| Specialty reinsurance            |                        | 79.5                        | 32.7                                        |    | 59.9             |  |  |
| Total                            | \$                     | 288.0                       | 1.7%                                        | \$ | 283.3            |  |  |

Losses and loss adjustment expenses. The net loss ratio for the three months ended June 30, 2011 was 77.0% compared to 50.3% in the equivalent period in 2010. The increase in the loss ratio is attributable to net losses of \$70.3 million before reinstatements from the U.S. storms in the quarter while the comparable period of 2010 did not

have significant catastrophe losses. The increase was partly mitigated by a \$14.2 million increase in prior year reserve releases from \$11.1 million in the second quarter of 2010 to \$25.3 million in the current period following favorable development in the property reinsurance and specialty reinsurance lines. The net loss ratio in the period was also impacted by 3.1 percentage points reflecting the \$11.2 million increase in ceded earned premium.

Further information relating to the movement of prior year reserves is found below under "Reserves for Losses and Loss Adjustment Expenses."

Policy acquisition, general and administrative expenses. Policy acquisition expenses were \$49.1 million for the three months ended June 30, 2011 equivalent to 18.3% of net premiums earned (2010 — \$47.3 million or 16.2% of net premiums earned). The increase in the acquisition expense ratio is due to our purchase of additional reinsurance reducing our net earned premium and a change in the mix of business written where we have written less international casualty and risk excess business, which have low average commission rates and more credit and surety, specialty reinsurance and risk solutions business, which have higher average commission rates. A reduction in general and administrative expenses of \$3.7 million from the second quarter of 2010 is mainly due to reduced performance-related pay and long term incentive plan accruals following the high loss activity in 2011.

#### Insurance

Our insurance segment consists of property insurance, casualty insurance, marine, energy and transportation insurance and financial and professional lines insurance. See Note 5 of the financial statements for descriptions of the lines of business within this segment.

Gross written premiums. Overall premiums have increased by 12.2% to \$294.2 million for the quarter from \$262.1 million in the equivalent period in 2010. The increase in gross written premium is attributable to the marine, energy and transportation lines and financial and professional lines where we have seen policy extensions, increased line sizes and additional demand, in particular for our kidnap and ransom products which form part of our financial and political risk business. Increases in our marine, energy and transportation insurance were mainly due to increased premiums in our marine, energy and construction liability account which achieved significant rate increases following the Deepwater Horizon loss last year. Gross written premiums in our casualty insurance lines have reduced when compared with the second quarter of 2010 where we have declined business that did not meet our profitability requirements coupled with higher client retention in some classes.

The table below shows our gross written premiums for each line of business for the three months ended June 30, 2011 and 2010, and the percentage change in gross written premiums for each line:

|                                             | Gross Written Premiums                      |       |                           |    |                                             |  |  |
|---------------------------------------------|---------------------------------------------|-------|---------------------------|----|---------------------------------------------|--|--|

| Marine, energy and transportation insurance |                                             | 130.3 | 10.3                      |    | 118.1                                       |  |  |
| Financial and professional lines insurance  |                                             | 57.4  | 91.3                      |    | 30.0                                        |  |  |
| Total                                       | \$                                          | 294.2 | 12.2%                     | \$ | 262.1                                       |  |  |

Losses and loss adjustment expenses. The loss ratio for the quarter was 62.6% compared to 69.1% for the three months ended June 30, 2010. The reduction in loss ratios for the quarter is mainly due to the change in the prior year reserve releases from a \$9.0 million reserve strengthening in the second quarter of 2010 to a \$7.5 million of prior year reserve releases in the current quarter. The \$8.7 million of net losses associated with the U.S. storms in the second quarter of 2011 added 4.5 percentage points to the loss ratio. The net loss ratio in the period was also impacted by 3.2 percentage points reflecting \$10.2 million of additional ceded earned premium.

The release in the current quarter was due primarily to our property and marine, energy and transportation business lines following favorable loss development, but was partly offset by deterioration in financial and professional lines where we have claims from professional lines that have exposure to the financial crisis.

Policy acquisition, general and administrative expenses. Policy acquisition expenses of \$37.6 million for the three months ended June 30, 2011 equivalent to 19.6% of net premiums earned (2010 — \$30.5 million or 16.2% of net earned premium) were \$7.1 million higher than those in the second quarter of 2010. This was mainly due to the increase in premiums earned. Higher acquisition costs were also attributable to a slight change in our business mix, including a shift from the casualty insurance lines towards our successful energy physical damage, U.S. property and kidnap and ransom business, which attract a relatively higher acquisition expense ratio. The increase by \$7.3 million in our general and administrative expense ratio is mainly associated with the continued build out of our U.S. operations.

## Total Income Statement — Second Quarter

Our statements of operations consolidate the underwriting results of our two segments and include certain other revenue and expense items that are not allocated to the business segments.

Gross written premiums. Total gross written premiums increased by 6.7% to \$582.2 million in the second quarter of 2011 when compared to 2010. Gross written premiums in the insurance segment have increased by 12.2% to \$294.2 million when compared to the second quarter of 2010 with the increase largely due to increased demand, particularly in our marine, energy and transportation line and our kidnap and ransom business which forms part of our financial and political risk insurance account.

Reinsurance ceded. Total reinsurance ceded for the quarter of \$56.5 million has increased by \$49.9 million from the second quarter of 2010. The reinsurance segment has recognized the costs of catastrophe programs purchased to provide additional cover for the upcoming wind season after the current year's catastrophe events. Reinsurance costs increased for the insurance segment when compared with the second quarter of 2010 which included downward ceded premium adjustment for our marine, energy and transportation lines as we reduced gross exposures in the Gulf of Mexico.

Gross premiums earned. Gross premiums earned reflect the portion of gross premiums written which are recorded as revenues over the policy periods of the risks we write. The earned premium recorded in any year includes premium from policies incepting in prior years and excludes premium to be earned subsequent to the reporting date. Gross premiums earned in the second quarter of 2011 were in line with the second quarter of 2010, as despite an increase in gross written premiums in the second quarter, we wrote less premium in the first quarter of 2011 than in the comparable period of 2010.

*Net premiums earned*. Net premiums earned have decreased by \$20.1 million or 4.2% in the second quarter of 2011 compared to 2010 which is consistent with the increase in reinsurance ceded for the quarter.

Losses and loss adjustment expenses. The loss ratio for the quarter of 71.0% has increased by 13.3 percentage points compared to the second quarter of 2010. The \$49.7 million increase is due mainly to losses from the U.S. storms which caused tornadoes and flood damage in the second quarter of 2011. Losses were offset by \$32.8 million of prior year reserve releases in the current quarter compared with \$2.1 million of reserve releases in the second quarter of 2010. Reserve releases in our reinsurance segment increased from \$11.1 million in the second quarter of 2010 to \$25.3 million in the current period following a favorable development in the property reinsurance and specialty reinsurance lines. The insurance segment had a \$7.5 million reserve release this quarter compared to a \$9.0 million reserve strengthening in the second quarter of 2010.

Expenses. We monitor the ratio of expenses to gross earned premium (the "gross expense ratio") as a measure of the cost effectiveness of our policy acquisition, general, administrative and corporate processes. The table below presents the contribution of the policy acquisition expenses and general, administrative and corporate expenses to the expense ratio and the total expense ratios for the three months ended June 30, 2011 and 2010. We also show the effect of reinsurance which impacts on the reported net expense ratio by expressing the expenses as a proportion of net earned premiums.

|                                                     | Expense F                  | Ratios               |
|-----------------------------------------------------|----------------------------|----------------------|

| Total net expense ratio                     | 28.2%                                       | 34.8%     | 34.0% | 26.5%                                       | 27.8%     | 29.2% |  |

<sup>(1)</sup> The total group general and administrative expense ratio includes the impact from corporate expenses.

The policy acquisition expense ratio, gross of the effect of reinsurance, has increased to 16.5% for the quarter from 14.9% in the second quarter of 2010. The increase is due to a change in the mix of business written across both segments where we have written a greater proportion of business with higher average commission rates, such as credit and surety, specialty reinsurance and risk solutions business in the reinsurance segment and kidnap and ransom, energy physical damage and U.S. professional lines in the insurance segment.

The general, administrative and corporate expense ratio, as a percentage of gross earned premium, has increased from 12.0% to 13.3% for the same period with general, administrative and corporate expenses increasing to \$69.6 million for the quarter compared with \$62.6 million in the second quarter of 2010. The increase in general, administrative and corporate expenses is due to building out our U.S insurance capacity, a U.K. regional platform and establishing a presence in the Swiss market to write insurance.

Total general, administrative and corporate expenses for the three months ended June 30, 2011 include \$14.0 million (2010 — \$10.6 million) of corporate expenses which are not allocated to our underwriting segments. We consider corporate expenses to be certain holding company costs necessary to support our worldwide insurance and reinsurance operations, share-based compensation expenses allocated to group functions and costs associated with operating as a publicly traded company. The year on year increase is due to the expansion of our U.S operations and group support functions.

*Net investment income.* Net investment income for the quarter of \$58.6 million is 1.9% above the \$57.5 million in the second quarter of 2010 due to the increase in cash and invested assets from \$6.8 billion to \$7.5 billion compensating for the lower portfolio book yield plus additional income from the global equity investments.

Change in fair value of derivatives. In the three months ended June 30, 2011, we recorded a loss of \$25.5 million (2010 — \$0.1 million) for the interest rate swaps due to falling interest rates and their impact on fixed income valuations and yields. We also hold five foreign currency contracts which had a gain of \$3.2 million for the three months ended June 30, 2011 (2010 — two contracts with a gain of \$1.2 million).

We cancelled our credit insurance contract as of November 28, 2010. In the three months ended June 30, 2010, we recorded a reduction of \$2.0 million in the estimated fair value of the credit insurance contract including an interest expense of \$0.2 million. Further information on these contracts can be found in Note 9 to the financial statements.

Other-than-temporary impairments. The difference between the cost and the estimated fair market value of available for sale investments is monitored to determine whether any investment has experienced a decline in value that is believed to be other-than-temporary. Impairment occurs when there is no objective evidence to support recovery in value before disposal and we intend to sell the security or more likely than not will be required to sell the security before recovery of its adjusted amortized cost basis or it is deemed probable that we will be unable to collect all amounts due according to the contractual terms of the individual security. These impairments will be included within realized losses and the cost basis of the investment reduced accordingly.

We review all of our fixed maturities on an individual security basis for potential impairment each quarter based on criteria including issuer-specific circumstances, credit ratings actions and general macro-economic conditions. For the realized investments losses in the second quarter of 2011, an impairment charge was not required as a result of the review of OTTI (2010 — \$Nil).

Income before tax. In the second quarter of 2011, profit before tax was \$11.4 million, comprised of \$22.9 million of underwriting losses, \$58.6 million in net investment income, \$22.3 million of losses from a change in fair value of derivatives, \$1.1 million of net realized and unrealized investment and foreign exchange losses, \$7.7 million of interest expense and \$6.8 million of other income. In the second quarter of 2010, income before tax was \$121.0 million which comprised \$62.8 million of underwriting income, \$57.5 million in net investment income, \$2.1 million of losses from a change in fair value of derivatives, \$3.1 million of net foreign exchange and investment gains, \$4.0 million of interest expense and \$3.7 million of other income.

*Income tax charge.* Income tax charge for the three months ended June 30, 2011 was \$1.2 million. Our effective consolidated tax rate for the three months ended June 30, 2011 was 10.5% (2010 — 10.0%). The charge represents an estimate of the tax rate which will apply to our pre-tax income for 2011. As discussed in the "Overview" above, the effective tax rate for the year is subject to revision.

Net income after tax. Net income after tax for the three months ended June 30, 2011 was \$10.2 million, equivalent to a \$0.06 basic earnings per ordinary share adjusted for the \$5.7 million preference share dividends and fully diluted earnings per ordinary share of \$0.06 during the three months ended June 30, 2011. The net income for the three months ended June 30, 2010 was \$108.9 million equivalent to basic earnings per ordinary share of \$1.34 adjusted for the \$5.7 million preference share dividend and fully diluted earnings per share of \$1.28.

### Results of Operations for the Six Months Ended June 30, 2011 Compared to the Six Months Ended June 30, 2010

The following is a discussion and analysis of our consolidated results of operations for the six months ended June 30, 2011 and 2010 starting with a discussion of segmental results and then summarizing our consolidated results under "Total Income Statement — Half Year" below.

# **Underwriting Results by Operating Segments**

Please refer to the tables in Note 5 in our unaudited financial statements of this report for a summary of gross and net written and earned premiums, underwriting results and combined ratios and reserves for our two business

segments for the six months ended June 30, 2011 and 2010. The contributions of each segment to gross written premiums in the six months ended June 30, 2011 and 2010 were as follows:

|                  |         | Gross Written Premiums     |                     |                               |  |  |  |

## Reinsurance

Gross written premiums. Gross written premiums in our reinsurance segment decreased by 6.2% compared to the six months ended June 30, 2010. The decrease in gross written premiums has come mainly from reductions in casualty and other property reinsurance where we are seeing challenging market conditions and prices that do not meet our profitability requirements.

The table below shows our gross written premiums for each line of business for the six months ended June 30, 2011 and 2010, and the percentage change in gross written premiums for each such line:

|                                  | Gross Written Premiums                    |       |        |    |                                           |  |             |  |                  |

| Total                            | \$                                        | 725.1 | (6.2)% | \$ | 773.4                                     |  |             |  |                  |

Losses and loss adjustment expenses. The net loss ratio for the six months ended June 30, 2011 was 114.1% compared to 69.3% in the equivalent period in 2010. The increase in the loss ratio is attributable to a number of catastrophe losses in the period with \$34.7 million from the Australian floods, \$78.2 million from the New Zealand earthquake and \$181.1 million from the Japanese earthquake and tsunami which occurred in the first quarter of 2011 plus \$70.3 million from the U.S. storms in the second quarter. All losses are net of reinsurance recoveries but before reinstatement premiums and tax. The increase has been partly mitigated by a \$19.9 million increase in prior year reserve releases to \$46.1 million compared to \$26.2 million in the six months ended June 30, 2010 experienced gross losses of \$125.2 million in relation to the earthquake in Chile in the first quarter of 2010.

Further information relating to the movement of prior year reserves is found below under "Reserves for Losses and Loss Adjustment Expenses."

Policy acquisition, general and administrative expenses. Policy acquisition expenses were \$98.5 million for the six months ended June 30, 2011 equivalent to 18.2% of net premiums earned (2010 — \$99.7 million or 17.1% of net premiums earned). The increase in the ratio is due to our purchase of additional reinsurance reducing our net earned premium but also due to a change in the mix of business where we have written less international casualty and risk excess business which have low average commission rates and more credit and surety, specialty reinsurance and risk solutions business which have higher average commission rates. A reduction in general and administrative expenses of \$1.5 million from the six months ended June 30, 2010 is attributable mainly to lower performance-related accruals following the high loss activity for the first six months of 2011.

### Insurance

Gross written premiums. Overall premiums have increased by 11.3% to \$528.4 million for the six months ended June 30, 2011 from \$474.8 million in the equivalent period in 2010. The increase in gross written premium is attributable to the marine, energy and transportation lines and financial and professional lines where we have seen policy extensions and increased line sizes and additional demand, in particular for our kidnap and ransom products which form part of our financial and political risk business. Gross written premiums in our casualty insurance lines have reduced when compared with the six months ended June 30, 2010 where we have declined business that did not meet our profitability requirements coupled with higher client retention in some classes.

The table below shows our gross written premiums for each line of business for the six months ended June 30, 2011 and 2010, and the percentage change in gross written premiums for each line:

|                                             | Gross Written Premiums |                           |                                           |                  |       |  |  |

Losses and loss adjustment expenses. The loss ratio for the six months ended June 30, 2011 was 64.2% compared to 69.1% for the six months ended June 30, 2010. The decrease in the loss ratio is attributable to an \$8.6 million prior year reserve release compared to an \$11.2 million reserve strengthening in the six months ended June 30, 2010. The current period was impacted by \$8.7 million of net catastrophe losses from the U.S. storms in the second quarter of 2011. The comparative period did not have any significant catastrophe losses.

The reserve releases in the six months ended June 30, 2011 were due primarily to our property U.K. liability and aviation accounts following favorable loss developments for these accounts which were partly offset by deterioration in financial and professional lines where we have claims from professional liability lines.

Policy acquisition, general and administrative expenses. Policy acquisition expenses of \$69.6 million for the six months ended June 30, 2011, equivalent to 18.7% of net premiums earned (2010 — \$62.6 million or 17.1% of net earned premium), were \$7.0 million higher than those in 2010. This was mainly due to an increase in premiums written, but also due to a change in the mix of business written where we have written a lower proportion of casualty business which has lower average commission rates and a higher proportion of kidnap and ransom business which incurs higher commission rates. General and administrative expenses of \$58.4 million in the six months ended June 30, 2011 have increased from \$42.3 million over the comparative period in 2010 mainly due to our continued build out of the U.S. operations.

## Total Income Statement — Half Year

Our statements of operations consolidate the underwriting results of our two segments and include certain other revenue and expense items that are not allocated to the business segments.

*Gross written premiums*. Total gross written premiums of \$1,253.5 million in the first six months of 2011 is in line with the \$1,248.2 million written in 2010 with the increase in the insurance segment largely offset by a decrease in the reinsurance segment.

Gross written premiums in our reinsurance segment decreased by 6.2% compared to the six months ended June 30, 2010. The decrease in gross written premiums has come from most lines, but in particular casualty reinsurance where we experienced challenging market conditions and prices that did not meet our profitability requirements. Following a strategic decision to cut back on some other property reinsurance business, in particular property risk excess, we have also seen an expected reduction in this area. The decreases were offset by increased premiums written in our credit and surety and agriculture accounts within our specialty reinsurance lines.

Gross written premiums in our insurance segment have increased by 11.3% to \$528.4 million for the six months ended June 30, 2011 from \$474.8 million in the equivalent period in 2010. The increase in gross written premium is attributable to the marine, energy and transportation lines and financial and professional lines where we have seen policy extensions and increased line sizes and additional demand, in particular for our kidnap and ransom products which form part of our financial and political risk business. Following the losses from the Deepwater Horizon incident, our marine, energy and construction liability team wrote additional business at significantly increased rates. Gross written premiums in our casualty insurance lines have reduced when compared with the six months ended June 30, 2010 where we have declined business that did not meet our profitability requirements coupled with higher client retention in some classes.

Reinsurance ceded. Total reinsurance ceded of \$218.2 million has increased by \$88.9 million from the first six months of 2010. The reinsurance segment has recognized the costs of catastrophe programs purchased to provide additional cover for the upcoming wind season after the first quarter's catastrophe events. Reinsurance costs increased for the insurance segment when compared with the first six months of 2010 as we have purchased advanced protection for our new U.S. professional lines business as well as an increase in the U.S. property program.

Gross premiums earned. Gross premiums earned reflect the portion of gross premiums written which are recorded as revenues over the policy periods of the risks we write. The earned premium recorded in any year includes premium from policies incepting in prior years and excludes premium to be earned subsequent to the reporting date. Gross premiums earned in the first half of 2011 decreased by 0.7% compared to the same period of 2010 as a result of the reduction in gross written premiums in the first quarter.

*Net premiums earned.* Net premiums earned have decreased by \$35.3 million or 3.7% in the first half of 2011 compared to 2010 which is consistent with the decrease in gross earned premiums for the period and the increase in reinsurance ceded for the quarter.

Losses and loss adjustment expenses. Losses and loss adjustment expenses have increased from \$655.5 million in 2010 to \$855.3 million in 2011 primarily due to \$373.3 million of losses from natural disasters that occurred in the first half of 2011 (Australian floods, New Zealand earthquake, Japanese earthquake and tsunami and U.S. storms). Reserve releases increased by \$39.7 million in the current period following favorable development in property and specialty reinsurance and aviation, property and U.K. liability insurance business lines.

The loss ratio for the half year of 93.8% has increased by 24.6 percentage points compared to the first half of 2010. The increase is due mainly to losses from the Australian floods, the New Zealand earthquake, the Japanese earthquake and tsunami and the U.S. storms which occurred in the first half of 2011. The comparative period included \$125.4 million of losses from the Chilean earthquake, while losses from the four natural disasters during the current period were \$373.3 million. Reserve releases in our reinsurance segment increased from \$26.2 million in the first half of 2010 to \$46.1 million in the current period following favorable development in property reinsurance and specialty reinsurance lines. The insurance segment had an \$8.6 million reserve release for the six months of 2011 compared to an \$11.2 million reserve strengthening in the first half of 2010.

We have presented loss ratios excluding the impact from prior year reserve adjustments and catastrophic losses to aid in the analysis of the underlying performance of our segments. We have defined catastrophic losses as losses associated with the U.S. storms which occurred in the second quarter of 2011 in addition to loss estimates associated with the Australian floods and New Zealand and Japanese earthquakes which occurred in the first quarter of 2011.

Catastrophic losses in the comparative period represent the development in the second quarter of 2010, of losses associated with the Chilean earthquake which occurred in the first quarter of 2010. The underlying changes in accident year loss ratios by segment are also shown in the table below. The prior year adjustment in the table below reflects prior-year reserve movements and premium adjustments. The current year adjustments represent catastrophic loss events and reflect net claims and reinstatement premium adjustments.

| For the Six Months Ended June 30, 2011 | Total Loss<br>Ratio | Prior Year<br>Adjustment | Total<br>Accident Year<br>Loss Ratio | Current Year<br>Adjustment | Accident Year Loss Ratio Excluding Prior and Current Year Adjustments |

Accident

Expenses. We monitor the gross expense ratio as a measure of the cost effectiveness of our policy acquisition, general, administrative and corporate processes. The table below presents the contribution of the policy acquisition expenses and general, administrative and corporate expenses to the expense ratio and the total expense ratios for the six months ended June 30, 2011 and 2010. We also show the effect of reinsurance which impacts on the reported net expense ratio by expressing the expenses as a proportion of net earned premiums.

|                                                     | Expense R                                 | atios                                     |
|-----------------------------------------------------|-------------------------------------------|-------------------------------------------|
|                                                     | For the Six Months<br>Ended June 30, 2011 | For the Six Months<br>Ended June 30, 2010 |

<sup>(1)</sup> The total group general and administrative expense ratio includes the impact from corporate expenses.

The policy acquisition expense ratio, gross of the effect of reinsurance, has increased to 16.3% for the first six months of 2011 from 15.6% in the first six months of 2010. The increase is due mainly to a change in the mix of business written across both segments where we have written a greater proportion of business with higher average commission rates.

The general, administrative and corporate expense ratio, as a percentage of net earned premium, has increased from 11.1% to 12.7% for the same period with general, administrative and corporate expenses increasing to \$131.0 million for the first half of 2011 compared with \$115.1 million in the first half of 2010. The increase in general, administrative and corporate expenses is due to building out our U.S insurance capacity, a U.K. regional platform and establishing a presence in the Swiss market to write insurance.

*Net investment income.* Net investment income of \$114.1 million has decreased by 2.4% compared to \$116.9 million in the first half of 2010 due to lower reinvestment rates and hence declining book yields from fixed income securities partially offset by \$3.2 million of income from global equity securities.

Change in fair value of derivatives. In the six months ended June 30, 2011, we recorded a charge of \$25.4 million (2010 — \$0.1 million) for the interest rate swaps due to falling interest rates and their impact on fixed income valuations and yields. We also hold five foreign currency contracts which had a net loss of \$0.3 million for the six months ended June 30, 2011 (2010 — two contracts with a gain of \$1.2 million).

We cancelled our credit insurance contract as of November 28, 2010. In the six months ended June 30, 2010, we recorded a reduction of \$4.0 million in the estimated fair value of the credit insurance contract including an interest expense of \$0.4 million. Further information on these contracts can be found in Note 9 to the financial statements.

Other-than-temporary impairments. We review all of our fixed maturities on an individual security basis for potential impairment each quarter based on criteria including issuer-specific circumstances, credit ratings actions and general macro-economic conditions. The realized investments losses in the first half of 2011 did not include a charge for investments we believe to be other-than-temporarily impaired (2010 — \$0.3 million).

Income before tax. In the first half of 2011, losses before tax were \$156.8 million, comprised of \$242.2 million of underwriting losses, \$114.1 million in net investment income, \$25.7 million of losses from changes in fair value of derivatives, \$13.7 million of net realized and unrealized investment and foreign exchange gains, \$15.4 million of interest expense and \$1.3 million of other expenses. In the first half of 2010, income before tax was \$141.3 million which comprised \$14.6 million of underwriting income, \$116.9 million in net investment income, \$4.1 million of losses from changes in fair value of derivatives, \$16.9 million of net foreign exchange and investment gains, \$7.8 million of interest expense and \$4.8 million of other income. Our decrease in underwriting income in 2011 was mainly due to the \$352.6 million of losses net of reinsurance and re-instatement premiums associated with the Australian floods, New Zealand earthquake, Japan earthquake and tsunami and U.S. storms.

*Income tax benefit.* Income tax benefit for the six months ended June 30, 2011 was \$15.3 million. Our effective consolidated tax rate for the six months ended June 30, 2011 was 9.8% (2010 — 10.0%). The recovery represents an estimate of the tax rate which will apply to our pre-tax income for 2011. As discussed in the "Overview" above, the effective tax rate for the year is subject to revision.

Net income after tax. Net loss after tax for the six months ended June 30, 2011 was \$141.5 million, equivalent to a \$2.16 basic and diluted loss per ordinary share adjusted for the \$11.4 million preference share dividends and on the basis of the weighted average number of ordinary shares in issue during the six months ended June 30, 2011. Net income for the six months ended June 30, 2010 was \$127.2 million equivalent to basic earnings per ordinary share of \$1.50 adjusted for the \$11.4 million preference share dividend and fully diluted earnings per share of \$1.43.

# Reserves for Losses and Loss Adjustment Expenses

As of June 30, 2011, we had total net loss and loss adjustment expense reserves of \$4,032.4 million (December 31, 2010 — \$3,540.6 million). This amount represented our best estimate of the ultimate liability for payment of losses and loss adjustment expenses. Of the total gross reserves for unpaid losses of \$4,391.7 million

Reinsurance

Total losses and loss expense reserves

Insurance

at the balance sheet date of June 30, 2011, a total of \$2,428.7 million or 55.3% represented IBNR claims (December 31, 2010 — \$2,074.8 million and 54.3%, respectively). The following tables analyze gross and net loss and loss adjustment expense reserves by segment:

| Business Segment                       | Gross               | Recoverable                                    | Net        |  |  |  |
|                                        |                     | (\$ in millions)                               |            |  |  |  |

The increase in reinsurance recoverables is mainly due to recoveries from the gross prior year reserve strengthening in our insurance segment for our financial and professional lines business.

For the six months ended June 30, 2011, there was a reduction of our estimate of the ultimate net claims to be paid in respect of prior accident years of \$54.7 million. An analysis of this reduction by business segment is as follows for each of the three and six months ended June 30, 2011 and 2010:

|                                                   | For the  | Three        | For the Six      |          |  |
|---------------------------------------------------|----------|--------------|------------------|----------|--|
|                                                   | Months   | Months Ended |                  |          |  |
|                                                   | June 30, | June 30,     | June 30,         | June 30, |  |
| Business Segment                                  | 2011     | 2010         | 2011             | 2010     |  |
|                                                   | (\$ in m | illions)     | (\$ in millions) |          |  |
| Reinsurance                                       | \$ 25.3  | \$ 11.1      | \$ 46.1          | \$ 26.2  |  |
| Insurance                                         | 7.5      | (9.0)        | 8.6              | (11.2)   |  |
| Total Losses and loss expense reserves reductions | \$ 32.8  | \$ 2.1       | \$ 54.7          | \$ 15.0  |  |

The key elements which gave rise to the net positive development during the three months ended June 30, 2011 were as follows:

*Reinsurance*. Net reserve releases of \$25.3 million in the current quarter came from the other property reinsurance and specialty reinsurance business lines. The largest release in the quarter was \$11.1 million from property risk excess reinsurance due primarily to better than expected claims development.

*Insurance.* The net reserve releases of \$7.5 million in the quarter came largely from aviation, property and U.K. liability, partially offset by a strengthening in our financial and professional lines.

We did not make any significant changes in assumptions used in our reserving process. However, because the period of time we have been in operation is relatively short, for longer tail lines in particular, our loss experience is limited and reliable evidence of changes in trends of numbers of claims incurred, average settlement amounts, numbers of claims outstanding and average losses per claim will necessarily take years to develop.

For a more detailed description see "Management's Discussion and Analysis of Financial Condition and Results of Operations — Critical Accounting Policies" and "Management's Discussion and Analysis of Financial Condition and Results of Operations — Reserves for Losses and Loss Adjustment Expenses," included in our 2010 Annual Report on Form 10-K filed with the United States Securities and Exchange Commission.

## **Balance Sheet**

Total cash and investments

At June 30, 2011 and December 31, 2010, total cash and investments, including accrued interest receivable, were \$7.5 billion and \$7.3 billion, respectively. The composition of our investment portfolio is summarized below:

|                                                   | As at June 30, 2011     |                                                | As at December 31, 2010 |                                                |  |
|---------------------------------------------------|-------------------------|------------------------------------------------|-------------------------|------------------------------------------------|--|

Fixed maturities. At June 30, 2011, the average credit quality of our fixed income portfolio is "AA+," with 98% of the portfolio being rated "A" or higher. At December 31, 2010, the average credit quality of our fixed income portfolio was "AA+," with 96% of the portfolio being rated "A" or higher. Our fixed income portfolio duration has decreased as at June 30, 2011 to 2.5 years from 2.9 years as at December 31, 2010 and includes the impact of the interest-rate swaps which we entered into to partially mitigate against rises in interest rates.

Mortgage-Backed Securities. The following table summarizes the fair value of our mortgage-backed securities by rating and class at June 30, 2011:

|                                  | AAA        | AA and Below     |      | Total      |
|----------------------------------|------------|------------------|------|------------|
|                                  |            | (\$ in millions) |      |            |
| Agency                           | \$ 1,288.4 | \$               | _    | \$1,288.4  |
| Non-agency Commercial            | 79.8       |                  | 27.4 | 107.2      |
| Total Mortgage-backed Securities | \$ 1,368.2 | \$               | 27.4 | \$ 1,395.6 |

Our mortgage-backed portfolio is supported by loans diversified across a number of geographic and economic sectors.

Equity securities. During 2011, we made a small investment into equities, deploying \$175.0 million, or 2.3% of total investments as at June 30, 2011, into high quality equities via direct investment. Our overall portfolio strategy remains focused on high quality fixed income investments; however, market conditions and portfolio diversification prompted a limited move into equities. Our group investment guidelines allow us to deploy up to 10% of the investment portfolio in non-fixed income investments. We recognized dividend income of \$3.2 million (2010 — \$Nil) and \$6.4 million (2010 — \$Nil) net unrealized gains from the equity portfolio for the period ended June 30, 2011. Equity securities are comprised of U.S. and foreign equity securities and are classified as available for sale. The portfolio invests in high quality global equity securities with attractive dividend yields.

Other investments. As disclosed in Note 6, on May 19, 2009, Aspen Holdings invested \$25.0 million in Cartesian Iris 2009A L.P. through our wholly-owned subsidiary, Acorn Limited. Cartesian Iris 2009A L.P. is a Delaware Limited Partnership formed to provide capital to Iris Re, a Class 3 Bermudian reinsurer focusing on insurance-linked securities. On June 1, 2010, the investment in Cartesian Iris 2009A L.P. matured and was reinvested in the Cartesian Iris Offshore Fund L.P. The Company's involvement with Cartesian Iris Offshore Fund L.P. is limited to its investment in the fund, and it is not committed to making further investments in Cartesian Iris Offshore Fund L.P.; accordingly, the carrying value of the investment represents the Company's maximum exposure to a loss as a result of its involvement with the partnership at each balance sheet date.

In addition to returns on our investment, we provide services on risk selection, pricing and portfolio design in return for a percentage of profits from Iris Re. In the six months ended June 30, 2011, no fees were payable to us.

We have determined that each of Cartesian Iris 2009A L.P. and Cartesian Iris Offshore Fund L.P. has the characteristics of a variable interest entity that are addressed by the guidance in ASC 810, *Consolidation*. Neither Cartesian Iris 2009A L.P. nor Cartesian Iris Offshore Fund L.P. is consolidated by us. We have no decision-making power, those powers having been reserved for the general partner. The arrangement with Cartesian Iris Offshore Fund L.P. is simply that of an investee to which we provide additional services, including the secondment of an employee working under the direction of the board of Iris Re.

We have accounted for our investments in Cartesian Iris 2009A L.P. and Cartesian Offshore Fund L.P. in accordance with the equity method of accounting. Adjustments to the carrying value of this investment are made based on our share of capital including our share of income and expenses, which is provided in the quarterly management accounts of the partnership. The adjusted carrying value approximates fair value. In the three and six months ended June 30, 2011, our share of gains and losses decreased the value of our investment by \$0.1 million and \$Nil, respectively (2010 — \$0.3 million increase and \$0.5 million increase). The change in value has been recognized in realized and unrealized gains and losses in the condensed consolidated statement of operations.

The tables below show our other investments for the six months ended June 30, 2011 and twelve months ended December 31, 2010:

|                        |                       | Six Months Ended June 30, 2011 |                   |                      |                                              |  |  |  |

# Valuation of Fixed Income, Equities and Short Term Available for Sale Investments and Fixed Income and Short-Term Trading Investments

Fair Value Measurements. Our estimates of fair value for financial assets and liabilities are based on the framework established in the fair value accounting guidance included in ASC Topic 820, "Fair Value Measurements and Disclosures." The framework prioritizes the inputs, which refer broadly to assumptions market participants would use in pricing an asset or liability, into three levels, which are described in more detail below.

### **Fixed Maturities**

The Company's fixed income maturity securities are classified as either available for sale or trading and carried at fair value. At June 30, 2011 and December 31, 2010, we used substantially the market approach valuation techniques (e.g. use of quoted market values and other relevant observable market data provided by independent pricing sources) for estimating the fair values of fixed maturities. The pricing sources are primarily nationally recognized independent pricing services and broker-dealers.

Independent Pricing Services. Pricing services provide pricing for less complex, liquid securities based on market quotations in active markets. For securities that do not trade on a listed exchange, these pricing services may use matrix pricing consisting of observable market inputs to estimate the fair value of a security. These observable market inputs include: reported trades, benchmark yields, brokerdealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and industry and economic factors. Additionally, pricing services may use a valuation model such as an option adjusted spread model commonly used for estimating fair values of mortgage-backed and asset-backed securities. At June 30, 2011, pricing for approximately 97% (2010 — 98%) of our total fixed maturities was based on prices provided by nationally recognized independent pricing services made up of 84% index providers and 13% pricing vendors.

*Broker-Dealers*. For the most part, we obtain quotes directly from broker-dealers who are active in the corresponding markets when prices are unavailable from independent pricing services or index providers. Generally, broker-dealers value securities through their trading desks based on observable market inputs. Their pricing methodologies include mapping securities based on trade data, bids or offers, observed spreads and performance on newly issued securities. They may also establish pricing through observing secondary trading of similar securities. Quotes from broker-dealers are non-binding. At June 30, 2011, pricing for approximately 3.1% (2010 — 2%) of our total fixed maturities was based on non-binding quotes from broker-dealers.

To validate the techniques or models used by third-party pricing sources, we review the process, in conjunction with the processes completed by the third-party accounting service provider, which include, but are not limited to:

- quantitative analysis (e.g., comparing the quarterly return for each managed portfolio to its target benchmark, with significant differences identified and investigated);
- initial and ongoing evaluation of methodologies used by outside parties to calculate fair value; and;
- comparison of the fair value estimates to our knowledge of the current market.

Prices obtained from brokers and pricing services are not adjusted by us; however, prices provided by a broker or pricing service in certain instances may be challenged based on market or information available from internal sources, including those available to our third-party investment accounting service provider. Subsequent to any challenge, revisions made by the broker or pricing service to the quotes are supplied to our investment accounting service provider.

The third-party accounting service provider maintains a vendor hierarchy in order to determine which price source provides the fair value (i.e. a price obtained from a pricing service with more seniority in the hierarchy will be used over a less senior one in all cases). The hierarchy prioritizes pricing services based on availability and reliability and assigns the highest priority to index providers.

At June 30, 2011, we obtained an average of 3.0 quotes per investment, compared to 2.9 quotes at December 31, 2010. Pricing sources used in pricing our fixed income investments at June 30, 2011 and December 31, 2010, respectively, were as follows:

|                  | As at<br><u>June 30, 2011</u> | As at<br>December 31, 2010 |
|------------------|-------------------------------|----------------------------|
| Index providers  | 84.0%                         | 85.2%                      |
| Pricing services | 12.9                          | 12.5                       |
| Broker-dealers   | 3.1                           | 2.3                        |
| Total            | 100.0%                        | 100.0%                     |

U.S. Government and Agency. U.S. government and agency securities consist primarily of bonds issued by the U.S. Treasury and corporate debt issued by agencies such as the GNMA, the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation and the Federal Home Loan Bank. As the fair values of our U.S. Treasury securities are based on unadjusted market prices in active markets, they are classified within Level 1. The fair values of U.S. government agency securities are priced using the spread above the risk-free yield curve. As the yields for the risk-free yield curve and the spreads for these securities are observable market inputs, the fair values of U.S. government agency securities are classified within Level 2.

Foreign Government. The issuers for securities in this category are non-U.S. governments and their agencies. The fair values of non-U.S. government bonds, primarily sourced from international indices, are based on unadjusted market prices in active markets and are therefore classified within Level 1. The fair values of the non-U.S. agency securities, again primarily sourced from international indices, are priced using the spread above the risk-free yield curve. As the yields for the risk-free yield curve and the spreads for these securities are observable market inputs, the fair values of non-U.S. agency securities are classified within Level 2.

*Municipals*. Our municipal portfolio comprises bonds issued by U.S. domiciled state and municipality entities. The fair value of these securities is determined using spreads obtained from broker-dealers, trade prices and the new issue market which are Level 2 inputs in the fair value hierarchy. Consequently, these securities are classified within Level 2.

Corporate. Corporate securities consist primarily of U.S. and foreign corporations covering a variety of industries and are for the most part priced by index providers and pricing vendors. Some issuers may participate in the Federal Deposit Insurance Corporation ("FDIC") program or other similar non-U.S. government programs which guarantee timely payment of principal and interest in the event of a default. The fair values of these securities are generally determined using the spread above the risk-free yield curve. Inputs used in the evaluation of these securities include credit data, interest rate data, market observations and sector news, broker dealer quotes and trade volumes. The Company classifies these securities within Level 2.

Mortgage-backed. Our residential and commercial mortgage-backed securities consist of bonds issued by the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation, as well as private, non-agency issuers. The fair values of these securities are determined through the use of a pricing model (including Option Adjusted Spread) which uses prepayment speeds and spreads to determine the appropriate average life of the mortgage-backed security. These spreads are generally obtained from broker-dealers, trade prices and the new issue market. As the significant inputs used to price mortgage-backed securities are observable market inputs these securities are classified within Level 2.

Asset-backed. The underlying collateral for the Company's asset-backed securities consists mainly of student loans, automobile loans and credit card receivables. These securities are primarily priced by index providers and pricing vendors. Inputs to the valuation process include dealer quotes and other available trade

information, prepayment speeds, interest rate data and credit spreads. The Company classifies these securities within Level 2.

### **Short-term investments**

Short-term investments comprise highly liquid debt securities with a maturity greater than three months but less than one year from the date of purchase and are classified as either trading or available for sale and carried at estimated fair value. Short term investments are valued in a manner similar to the Company's fixed maturity investments and are classified within Level 2.

## **Equity Securities**

Equity securities include U.S. and foreign common stocks and are classified as available for sale and carried at fair value. These securities are classified within Level 1 as their fair values are based on quoted market prices in active markets from independent pricing sources

## **Derivative Financial Instruments**

Foreign Currency Forward Contracts. The foreign currency forward contracts which we use to economically hedge currency risk are characterized as over-the-counter ("OTC") due to their customized nature and the fact that they do not trade on a major exchange. These instruments trade in a very deep liquid market, providing substantial price transparency and accordingly are classified as Level 2.

Interest Rate Swaps. The interest rate swaps which we use to economically hedge interest rate risk are also characterized as OTC and are valued by the counterparty using quantitative models with multiple market inputs. The market inputs, such as interest rates and yield curves, are observable and the valuation can be compared for reasonableness with third party pricing services. Consequently, these instruments are classified as Level 2.

Valuation of Other Investments. The value of our investment in Cartesian Iris Offshore Fund L.P. or in Cartesian Iris 2009A L.P. is based on our shares of the capital position of the partnership which includes income and expenses reported by the limited partnership as provided in its quarterly management accounts. Each of Cartesian Iris Offshore Fund L.P. and Cartesian Iris 2009A L.P. is subject to annual audit evaluating the financial statements of the partnership. We periodically review the management accounts of Cartesian Iris Offshore Fund L.P. and Cartesian Iris 2009A L.P. and evaluate the reasonableness of the valuation of our investment.

Guaranteed Investments. The following table presents the breakdown of investments which are guaranteed by mono-line insurers ("Wrapped Credit" disclosure) and those that have explicit government guarantees. The standalone rating is determined as the senior unsecured debt rating of the issuer. Where the credit ratings were split between the three main rating agencies (S&P's, Moody's and Fitch), the lowest rating was used.

|                          | As at June 30, 2011      |        |                 |                       | As at December 31, 2010  | )      |                 |

| AA-                      | AA-                      |        | 3.8             | AA-                   | AA-                      |        | 3.2             |
| A-                       | AA-                      |        | _               | A-                    | A-                       |        | 1.9             |
| BBB-                     | BBB-                     |        | 0.1             | BBB-                  | BBB-                     |        | 0.1             |
|                          |                          | \$     | 328.7           |                       |                          | \$     | 384.7           |

Our exposure to mono-line insurers was limited to one municipal holding (2010 — one municipal holding) as at June 30, 2011 with a market value of \$0.1 million (2010 — \$0.1 million). Our exposure to other third-party guaranteed debt is primarily to investments backed by the FDIC and non-U.S. government guaranteed issuers.

Other-than-temporary impairments. We recorded no OTTI charges for the six months ended June 30, 2011 (2010 — \$0.3 million). We review our available for sale investment portfolio on an individual security basis for potential impairment each quarter based on criteria including issuer-specific circumstances, credit ratings actions and general macro-economic conditions. The difference between the amortized cost or original cost and the estimated fair market value of available for sale investments is monitored to determine whether any investment has experienced a decline in value that is believed to be other-than-temporary. A security is impaired when the fair value is below its amortized cost or original cost.

In our review of fixed maturity investments, other-than-temporary impairment is deemed to occur when there is no objective evidence to support recovery in value of a security and a) we intend to sell the security or more likely than not will be required to sell the security before recovery of its adjusted amortized cost basis or b) it is deemed probable that we will be unable to collect all amounts due according to the contractual terms of the individual security. In the first case, the entire unrealized loss position is taken as an OTTI charge to realized losses in earnings. In the second case, the unrealized loss is separated into the amount related to credit loss and the amount related to all other factors. The OTTI charge related to credit loss is recognized in realized losses in earnings and the amount related to all other factors is recognized in other comprehensive income. The cost basis of the investment is reduced accordingly and no adjustments are made for subsequent recoveries in value.

Equity securities do not have a maturity date and therefore our review of these securities utilizes a higher degree of judgment. In our review we consider our ability and intent to hold an impaired equity security for a reasonable period of time to allow for a full recovery. Where a security is considered to be other-than-temporarily impaired, the entire charge is recognized in realized losses in earnings. Again, the cost basis of the investment is reduced accordingly and no adjustments are made for subsequent recoveries in value.

Although we review each security on a case by case basis, we have also established parameters to help identify securities in an unrealized loss position which are other-than-temporarily impaired. These parameters focus on the extent and duration of the impairment and for both fixed maturities and equities we consider declines in value of greater than 20% for 12 consecutive months to indicate that the security is other-than-temporarily impaired.

For a discussion of our valuation techniques within the fair value hierarchy, please see Note 7 of the financial statements included elsewhere in this report.

# **Capital Management**

Capital Management. On February 9, 2010, our Board of Directors authorized a new repurchase program for up to \$400 million of ordinary shares of which \$192.4 million remained available as at June 30, 2011. The authorization for the repurchase program covers the period to March 1, 2012.

On November 10, 2010, we entered into an accelerated share repurchase program with Barclays Capital to repurchase \$184 million of our ordinary shares. As of December 31, 2010, a total of 5,737,449 ordinary shares were received and cancelled. Upon the termination of the contract on March 14, 2011, an additional 542,736 ordinary shares were received and cancelled. A total of 6,280,185 ordinary shares were cancelled under this contract.

On February 16, 2011, an agreement was signed to repurchase 58,310 shares from the Names' Trustee. The shares were repurchased on March 10, 2011 and subsequently cancelled.

On June 29, 2011, an agreement was signed to repurchase 254,107 shares from the Names' Trustee for a total consideration of \$6.4 million. The transaction has not yet been completed.

The following table shows our capital structure at June 30, 2011 compared to December 31, 2010:

|                                                                                    | As at<br>June 30, 2011 |         | As at December 31, 2010 |         |
|------------------------------------------------------------------------------------|------------------------|---------|-------------------------|---------|
|                                                                                    |                        | (\$ i   | n millions)             |         |
| Share capital, additional paid-in capital, retained income and accumulated other   |                        |         |                         |         |
| comprehensive income attributable to ordinary shareholders                         | \$                     | 2,751.0 | \$                      | 2,888.3 |
| Preference shares (liquidation preference less issue expenses), net of issue costs |                        | 353.6   |                         | 353.6   |
| Long-term debt                                                                     |                        | 498.9   |                         | 498.8   |
| Total capital                                                                      | \$                     | 3,603.5 | \$                      | 3,740.7 |

Management monitors the ratio of debt to total capital, with total capital being defined as shareholders' equity plus outstanding debt. At June 30, 2011, this ratio was 13.8% (December 31, 2010 — 13.3%).

Our preference shares are classified in our balance sheet as equity but may receive a different treatment in some cases under the capital adequacy assessments made by certain rating agencies. Such securities are often referred to as 'hybrids' as they have certain attributes of both debt and equity. We also monitor the ratio of the total of debt and hybrids to total capital which was 23.7% as of June 30, 2011 (December 31, 2010 — 22.8%).

Access to capital. Our business operations are in part dependent on our financial strength and the market's perception thereof, as measured by total shareholders' equity, which was \$3,104.6 million at June 30, 2011 (December 31, 2010 — \$3,241.9 million). We believe our financial strength provides us with the flexibility and capacity to obtain funds through debt or equity financing. Our continuing ability to access the capital markets is dependent on, among other things, our operating results, market conditions and our perceived financial strength. We regularly monitor our capital and financial position, as well as investment and securities market conditions, both in

general and with respect to Aspen Holdings' securities. Our ordinary shares and all our preference shares are listed on the New York Stock Exchange.

### Liquidity

Liquidity is a measure of a company's ability to generate cash flows sufficient to meet short-term and long-term cash requirements of its business operations. Management monitors the liquidity of Aspen Holdings and of each of its Operating Subsidiaries and arranges credit facilities to enhance short-term liquidity resources on a stand-by basis.

Holding Company. We monitor the ability of Aspen Holdings to service debt, to finance dividend payments to ordinary and preference shareholders and to provide financial support to the Operating Subsidiaries.

As at June 30, 2011, Aspen Holdings held \$97.5 million (December 31, 2010 — \$354.0 million) in cash and cash equivalents which management considers sufficient to provide Aspen Holdings liquidity at such time, taken together with dividends declared or expected to be declared by subsidiary companies and our credit facilities. Aspen Holdings' liquidity depends on dividends, capital distributions and interest payments from our Operating Subsidiaries.

In the six months ended June 30, 2011, Aspen U.K. Holdings paid Aspen Holdings interest of \$25.7 million (2010 — \$18.3 million) in respect of intercompany loans and dividends of \$Nil (2010—\$15.0 million) and Aspen Insurance Limited paid Aspen Holdings dividends of \$100.0 million (2010 — \$Nil).

The ability of our Operating Subsidiaries to pay us dividends or other distributions is subject to the laws and regulations applicable to each jurisdiction, as well as the Operating Subsidiaries' need to maintain capital requirements adequate to maintain their insurance and reinsurance operations and their financial strength ratings issued by independent rating agencies. For a discussion of the various restrictions on our ability and our Operating Subsidiaries' ability to pay dividends, see Part I, Item 1 "Business — Regulatory Matters" in our 2010 Annual Report on Form 10-K filed with the United States Securities and Exchange Commission. Also for a more detailed discussion of our Operating Subsidiaries' ability to pay dividends, see Note 14 of our annual financial statements in our 2010 Annual Report on Form 10-K filed with the United States Securities and Exchange Commission.

Operating Subsidiaries. As of June 30, 2011, the Operating Subsidiaries held \$955.2 million (December 31, 2010 — \$772.8 million) in cash and short-term investments that are readily realizable securities. Management monitors the value, currency and duration of cash and investments held by its Operating Subsidiaries to ensure that they are able to meet their insurance and other liabilities as they become due and was satisfied that there was a comfortable margin of liquidity as at June 30, 2011 and for the foreseeable future.

On an ongoing basis, our Operating Subsidiaries' sources of funds primarily consist of premiums written, investment income and proceeds from sales and redemptions of investments.

Cash is used primarily to pay reinsurance premiums, losses and loss adjustment expenses, brokerage commissions, general and administrative expenses, taxes, interest and dividends and to purchase new investments.

The potential for individual large claims and for accumulations of claims from single events means that substantial and unpredictable payments may need to be made within relatively short periods of time.

We manage these risks by making regular forecasts of the timing and amount of expected cash outflows and ensuring that we maintain sufficient balances in cash and short-term investments to meet these estimates. Notwithstanding this policy, if our cash flow forecast is incorrect, we could be forced to liquidate investments prior to maturity, potentially at a significant loss.

The liquidity of our Operating Subsidiaries is also affected by the terms of our contractual obligations to policyholders and by undertakings to certain regulatory authorities to facilitate the issue of letters of credit or

maintain certain balances in trust funds for the benefit of policyholders. The following table shows the forms of collateral or other security provided to policyholders as at June 30, 2011 and December 31, 2010:

|                                                         | As at<br>June 30, 2011 |                                     | Dece | As at<br>ember 31, 2010 |
|---------------------------------------------------------|------------------------|-------------------------------------|------|-------------------------|
|                                                         |                        | (\$ in millions except percentages) |      |                         |
| Assets held in multi-beneficiary trusts                 | \$                     | 1,593.7                             | \$   | 1,895.7                 |
| Assets held in single beneficiary trusts                |                        | 397.0                               |      | 58.2                    |

| Secured letters of credit(1)                            |                        | 656.6                               |      | 533.8                   |
| Total                                                   | \$                     | 2,668.3                             | \$   | 2,487.7                 |
| Total as % of cash and invested assets                  |                        | 35.8%                               |      | 34.2%                   |

<sup>(1)</sup> As of June 30, 2011, the Company had securities and cash of \$788.9 million and £19.5 million (December 31, 2010 — \$699.9 million and £30.0 million) as collateral for the secured letters of credit.

For more information see Note 14(a) and our 2010 Annual Report on Form 10-K filed with the United States Securities and Exchange Commission.

Consolidated Cash Flows for the Six Months Ended June 30, 2011. Total net cash flow from operations was \$194.0 million, a reduction of \$53.9 million from the comparative period last year. The reduction was due mainly to higher ceded reinsurance costs. For the six months ended June 30, 2011, our cash flow from operations provided us with sufficient liquidity to meet our operating requirements. On May 31, 2011, we paid a dividend of \$0.15 per ordinary share to shareholders of record on May 13, 2011. On July 1, 2011, dividends totaling \$3.2 million on our Perpetual Preferred Income Equity Replacement Securities ("Perpetual PIERS") were paid to our dividend disbursing agent, for payment to our Perpetual PIERS holders of record on June 15, 2011. On July 1, 2011, dividends totaling \$2.5 million on our Perpetual Non-Cumulative Preference Shares ("Perpetual Preference Shares") were paid to our dividend disbursing agent, for payment to our Perpetual Preference Shares for payment to our Perpetual Preference Shares of record on June 15, 2011.

Credit Facility. On July 30, 2010, we entered into a three-year \$280.0 million revolving credit facility pursuant to a credit agreement (the "credit facilities") by and among the Company, certain of our direct and indirect subsidiaries, including the Operating Subsidiaries (collectively, the "Borrowers"), the lenders party thereto, Barclays Bank plc, as administrative agent, Citibank, NA, as syndication agent, Credit Agricole CIB, Deutsche Bank Securities Inc. and The Bank of New York Mellon, as co-documentation agents and The Bank of New York, as collateral agent.

The facility can be used by any of the Borrowers to provide funding for our Operating Subsidiaries, to finance the working capital needs of the Company and our subsidiaries and for general corporate purposes of the Company and our subsidiaries. The revolving credit facility further provides for the issuance of collateralized and uncollateralized letters of credit. Initial availability under the facility is \$280.0 million, and the Company has the option (subject to obtaining commitments from acceptable lenders) to increase the facility by up to \$75.0 million. The facility will expire on July 30, 2013. As of June 30, 2011, no borrowings were outstanding under the credit facilities. The fees and interest rates on the loans and the fees on the letters of credit payable by the Borrowers increase based on the consolidated leverage ratio of the Company.

Under the credit facilities, we must maintain at all times a consolidated tangible net worth of not less than approximately \$2.3 billion plus 50% of consolidated net income and 50% of aggregate net cash proceeds from the issuance by the Company of its capital stock, each as accrued from January 1, 2010. The Company must also not permit its consolidated leverage ratio of total consolidated debt to consolidated debt plus consolidated tangible net worth to exceed 35%. In addition, the credit facilities contain other customary affirmative and negative covenants as well as certain customary events of default, including with respect to a change in control. The various affirmative and negative covenants, include, among others, covenants that, subject to various exceptions, restrict the ability of the Company and its subsidiaries to: create or permit liens on assets; engage in mergers or consolidations; dispose of assets; pay dividends or other distributions; purchase or redeem the Company's equity securities or those of its

subsidiaries and make other restricted payments; permit the rating of any insurance subsidiary to fall below A.M. Best financial strength rating of B++; make certain investments; agree with others to limit the ability of the Company's subsidiaries to pay dividends or other restricted payments or to make loans or transfer assets to the Company or another of its subsidiaries. The credit facilities also include covenants that restrict the ability of our subsidiaries to incur indebtedness and guarantee obligations.

On April 29, 2009, Aspen Bermuda replaced its existing letter of credit facility with Citibank Europe dated October 29, 2008 in a maximum aggregate amount of up to \$450 million with a new letter of credit facility in a maximum aggregate amount of up to \$550 million. As at June 30, 2011, we had \$449.2 million of outstanding collateralized letters of credit under this facility.

On February 28, 2011, Aspen U.K. and Aspen Bermuda entered into an amendment to the \$200.0 million secured letter of credit facility agreement with Barclays dated as of October 6, 2009. The Amendment extends the maturity date of the credit facility to December 31, 2013. As at June 30, 2011, we had \$119.3 million of outstanding collateralized letters of credit under this facility compared to \$42.4 million at the end of 2010.

## **Contractual Obligations and Commitments**

The following table summarizes our contractual obligations (other than our obligations to employees, our Perpetual PIERS and our Perpetual Preference Shares) under long-term debt, operating leases (net of subleases) and reserves relating to insurance and reinsurance contracts as of June 30, 2011:

|                               |         |           |         |                  |         | Later   |           |
|-------------------------------|---------|-----------|---------|------------------|---------|---------|-----------|
|                               | 2011    | 2012      | 2013    | 2014             | 2015    | Years   | Total     |
|                               |         |           |         | (\$ in millions) |         |         | '         |
| Operating Lease Obligations   | \$ 5.3  | \$ 10.2   | \$ 9.4  | \$ 9.1           | \$ 8.6  | \$ 18.4 | \$ 61.0   |
| Long-Term Debt Obligations(1) | _       | _         | _       | \$250.0          | _       | \$250.0 | \$ 500.0  |
| Reserves for Losses and loss  |         |           |         |                  |         |         |           |
| adjustment expenses(2)        | \$607.0 | \$1,281.6 | \$762.8 | \$483.5          | \$321.8 | \$935.0 | \$4,391.7 |

- The long-term debt obligations disclosed above do not include the \$30.0 million annual interest payments on our outstanding senior notes.
- (2) In estimating the time intervals into which payments of our reserves for losses and loss adjustment expenses fall, as set out above, we have utilized actuarially assessed payment patterns. By the nature of the insurance and reinsurance contracts under which these liabilities are assumed, there can be no certainty that actual payments will fall in the periods shown and there could be a material acceleration or deceleration of claims payments depending on factors outside our control. This uncertainty is heightened by the short time in which we have operated, thereby providing limited Company-specific claims loss payment patterns. The total amount of payments in respect of our reserves, as well as the timing of such payments, may differ materially from our current estimates for the reasons set out in our 2010 Annual Report on Form 10-K under "— Critical Accounting Policies Reserves for Losses and Loss Expenses."

Further information on operating leases is given in our 2010 Annual Report on Form 10-K filed with the United States Securities and Exchange Commission.

For a discussion of derivative instruments we have entered into, please see Note 9 to our unaudited condensed consolidated financial statements for the three months ended June 30, 2011 included elsewhere in this report.

## **Effects of Inflation**

Inflation may have a material effect on our consolidated results of operations by its effect on interest rates and on the cost of settling claims. The potential exists, after a catastrophe or other large property loss, for the development of inflationary pressures in a local economy as the demand for services such as construction typically surges. We believe this had an impact on the cost of claims arising from the 2005 hurricanes. The cost of settling claims may also be increased by global commodity price inflation. We seek to take both these factors into account when setting reserves for any events where we think they may be material.

Our calculation of reserves for losses and loss expenses in respect of casualty business includes assumptions about future payments for settlement of claims and claims-handling expenses, such as medical treatments and litigation costs. We write casualty business in the United States, the United Kingdom and Australia and certain other territories, where claims inflation has in many years run at higher rates than general inflation. To the extent inflation causes these costs to increase above reserves established for these claims, we will be required to increase our loss reserves with a corresponding reduction in earnings. The actual effects of inflation on our results cannot be accurately known until claims are ultimately settled.

In addition to general price inflation we are exposed to a persisting long-term upwards trend in the cost of judicial awards for damages. We seek to take this into account in our pricing and reserving of casualty business.

We also seek to take into account the projected impact of inflation on the likely actions of central banks in the setting of short-term interest rates and consequent effects on the yields and prices of fixed income securities. We consider that although inflation is currently low, in the medium-term there is a risk that inflation, interest rates and bond yields will rise with the result that the market value of certain of our fixed income investments may reduce.

## **Cautionary Statement Regarding Forward-Looking Statements**

This Form 10-Q contains, and the Company may from time to time make other verbal or written, forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended, that involve risks and uncertainties, including statements regarding our capital needs, business strategy, expectations and intentions. Statements that use the terms "believe," "do not believe," "anticipate," "expect," "plan," "estimate," "project," "seek," "will," "may," "aim," "continue," "intend," "guidance" and similar expressions are intended to identify forward-looking statements. These statements reflect our current views with respect to future events and because our business is subject to numerous risks, uncertainties and other factors, our actual results could differ materially from those anticipated in the forward-looking statements. The risks, uncertainties and other factors set forth in the Company's 2010 Annual Report on Form 10-K filed with the Securities and Exchange Commission and other cautionary statements made in this report, as well as the following factors, should be read and understood as being applicable to all related forward-looking statements wherever they appear in this report.

All forward-looking statements address matters that involve risks and uncertainties. Accordingly, there are or will be important factors that could cause actual results to differ materially from those indicated in these statements. We believe that these factors include, but are not limited to, the following:

- the possibility of greater frequency or severity of claims and loss activity, including as a result of natural or man-made (including economic and political risks) catastrophic or material loss events, than our underwriting, reserving, reinsurance purchasing or investment practices have anticipated;
- the reliability of, and changes in assumptions to, natural and man-made catastrophe pricing, accumulation and estimated loss models;
- evolving issues with respect to interpretation of coverage after major loss events, any intervening legislative or governmental action and changing judicial interpretation and judgments on insurers' liability to various risks;
- the effectiveness of our loss limitation methods;
- changes in the total industry losses, or our share of total industry losses, such as the various losses from the U.S. storms in 2011, the earthquake and ensuing tsunami in Japan in 2011, floods in Australia in late 2010 and early 2011, the Deepwater Horizon incident in the Gulf of Mexico in 2010, the Chilean and the New Zealand Earthquakes in 2010, Hurricanes Ike and Gustav in 2008 and, with respect to such events, our reliance on loss reports received from cedants and loss adjustors, our reliance on industry loss estimates and those generated by modeling techniques, changes in rulings on flood damage or other exclusions as a result of prevailing lawsuits and case law;
- the impact of acts of terrorism and acts of war and related legislation;

- decreased demand for our insurance or reinsurance products and cyclical changes in the insurance and reinsurance sectors;
- any changes in our reinsurers' credit quality and the amount and timing of reinsurance recoverables;
- · changes in the availability, cost or quality of reinsurance or retrocessional coverage;
- the continuing and uncertain impact of the current depressed lower growth environment in many of the countries in which we
  operate;
- the level of inflation in repair costs due to limited availability of labor and materials after catastrophes;
- · changes in insurance and reinsurance market conditions;
- increased competition on the basis of pricing, capacity, coverage terms or other factors and the related demand and supply
  dynamics as contracts come up for renewal;
- a decline in our Operating Subsidiaries' ratings with S&P, A.M. Best or Moody's;
- our ability to execute our business plan to enter new markets, introduce new products and develop new distribution channels, including their integration into our existing operations;
- changes in general economic conditions, including inflation, foreign currency exchange rates, interest rates and other factors that could affect our investment portfolio;
- the risk of a material decline in the value or liquidity of all or parts of our investment portfolio;
- changes in our ability to exercise capital management initiatives or to arrange banking facilities as a result of prevailing market changes or changes in our financial position;
- changes in government regulations or tax laws in jurisdictions where we conduct business;
- Aspen Holdings or Aspen Bermuda becoming subject to income taxes in the United States or the United Kingdom;
- · loss of key personnel; and
- increased counterparty risk due to the credit impairment of financial institutions.

In addition, any estimates relating to loss events involve the exercise of considerable judgment and reflect a combination of ground-up evaluations, information available to date from brokers and cedants, market intelligence, initial tentative loss reports and other sources. Due to the complexity of factors contributing to losses and the preliminary nature of the information used to prepare estimates, there can be no assurance that our ultimate losses will remain within stated amounts.

The foregoing review of important factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included in this report. We undertake no obligation to publicly update or review any forward-looking statement, whether as a result of new information, future developments or otherwise or disclose any difference between our actual results and those reflected in such statements.

If one or more of these or other risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, actual results may vary materially from what we projected. Any forward-looking statements you read in this report reflect our current views with respect to future events and are subject to these and other risks, uncertainties and assumptions relating to our operations, results of operations, growth strategy and liquidity. All subsequent written and oral forward-looking statements attributable to us or individuals acting on our behalf are expressly qualified in their entirety by the points made above. You should specifically consider the factors identified in this report which could cause actual results to differ before making an investment decision.

# Item 3. Quantitative and Qualitative Disclosures about Market Risk

*Interest rate risk.* Our investment portfolio consists primarily of fixed income securities. Accordingly, our primary market risk exposure is to changes in interest rates. Fluctuations in interest rates have a direct impact on the

market valuation of these securities. As interest rates rise, the market value of our fixed-income portfolio falls, and the converse is also true. Our strategy for managing interest rate risk includes maintaining a high quality portfolio with a relatively short duration to reduce the effect of interest rate changes on book value. In addition, the Company partially mitigates its exposure to interest rates by entering into interest rate swaps with financial institution counterparties in the ordinary course of its investment activities.

As at June 30, 2011, our fixed income portfolio had an approximate duration of 3.1 years excluding the impact of interest-rate swaps. The table below depicts interest rate change scenarios and the effect on our interest-rate sensitive invested assets:

## Effect of Changes in Interest Rates on Portfolio Given a Parallel Shift in the Yield Curve

| Movement in Rates in Basis Points | -100      | -50                                  | 0         | 50        | 100       |  |  |
|-----------------------------------|-----------|--------------------------------------|-----------|-----------|-----------|--|--|
|                                   |           | (\$ in millions, except percentages) |           |           |           |  |  |
| Market value \$ in millions       | \$6,160.3 | \$6,066.6                            | \$5,972.8 | \$5,897.0 | \$5,785.2 |  |  |
| Gain/(loss) \$ in millions        | 188.0     | 94.0                                 | _         | (94.0)    | (188.0)   |  |  |
| Percentage of portfolio           | 3.1%      | 1.6%                                 | %         | (1.6)%    | (3.1)%    |  |  |

Equity risk. We have invested in equity securities which had a fair market value of \$178.1 million at June 30, 2011, equivalent to 2.4% of the total of investments, cash and cash equivalents at that date. These equity investments are exposed to equity price risk, defined as the potential for loss in market value due to a decline in equity prices. We believe that the effects of diversification and the relatively small size of our investments in equities relative to total invested assets mitigate our exposure to equity price risk.

Foreign currency risk. Our reporting currency is the U.S. Dollar. The functional currencies of our operations are U.S. Dollars, British Pounds, Euros, Canadian Dollars, Swiss Francs, Australian Dollars and Singaporean Dollars. As of June 30, 2011, approximately 80% of our cash, cash equivalents and investments were held in U.S. Dollars, approximately 7% were in British Pounds and approximately 13% were in other currencies. For the six months ended June 30, 2011, approximately 19.5% of our gross premiums were written in currencies other than the U.S. Dollar and the British Pound and we expect that a similar proportion will be written in currencies other than the U.S. Dollar and the British Pound in the remainder of 2011.

Other foreign currency amounts are re-measured to the appropriate functional currency and the resulting foreign exchange gains or losses are reflected in the statement of operations. Functional currency amounts of assets and liabilities are then translated into U.S. Dollars. The unrealized gain or loss from this translation, net of tax, is recorded as part of shareholders' equity. The change in unrealized foreign currency translation gain or loss during the period, net of tax, is a component of comprehensive income. Both the remeasurement and translation are calculated using current exchange rates for the balance sheets and average exchange rates for the statement of operations. We may experience exchange losses to the extent our foreign currency exposure is not hedged, which in turn would adversely affect our results of operations and financial condition. Management estimates that a 10% change in the exchange rate between British Pounds and U.S. Dollars as at June 30, 2011, would have impacted reported net comprehensive income by approximately \$30.9 million for the six months ended June 30, 2011.

We manage our foreign currency risk by seeking to match our liabilities under insurance and reinsurance policies that are payable in foreign currencies with investments that are denominated in these currencies. This may involve the use of forward exchange contracts from time to time. A forward exchange contract involves an obligation to purchase or sell a specified currency at a future date at a price set at the time of the contract. Foreign currency exchange contracts will not eliminate fluctuations in the value of our assets and liabilities denominated in foreign currencies but rather allow us to establish a rate of exchange for a future point in time. All realized gains and losses on foreign exchange forward contracts are recognized in the Statements of Operations as changes in fair value of derivatives. As at June 30, 2011, we held five foreign currency contracts with a net loss for the six months of \$0.3 million (2010 — two contracts with a gain of \$1.2 million).

*Credit risk.* We have exposure to credit risk primarily as a holder of fixed income securities. Our risk management strategy and investment policy is to invest in debt instruments of high credit quality issuers and to limit the amount of credit exposure with respect to particular ratings categories, business sectors and any one issuer. As at

June 30, 2011 and December 31, 2010, the average rating of fixed income securities in our investment portfolio was "AA+". We also have credit risk through exposure to our swap counterparties who are Goldman Sachs Group (senior unsecured rating of A1 by Moody's & A by S&P) and Credit Agricole Corporate and Investment Bank (senior unsecured rating of AA3 by Moody's & long term issuer credit rating of AA- by S&P).

In addition, we are exposed to the credit risk of our insurance and reinsurance brokers to whom we make claims payments for our policyholders, as well as to the credit risk of our reinsurers and retrocessionaires who assume business from us. Other than fully collateralized reinsurance the substantial majority of our reinsurers have a rating of "A" (Excellent), the third highest of fifteen rating levels, or better by A.M. Best and the minimum rating of any of our material reinsurers is "A—" (Excellent), the fourth highest of fifteen rating levels, by A.M. Best.

See Note 8 to the unaudited financial statements for the three months ended June 30, 2011 above.

The table below shows our reinsurance recoverables as of June 30, 2011 and December 31, 2010, and our reinsurers' ratings.

| A.M. Best            | As at<br>June 30, 2011 | As at December 31, 2010 |  |
|----------------------|------------------------|-------------------------|--|
|                      | (\$ in millions)       | (\$ in millions)        |  |
| A++                  | \$ 8.6                 | \$ 7.5                  |  |
| A+                   | 81.6                   | 74.0                    |  |
| A                    | 194.9                  | 173.5                   |  |
| A-                   | 18.3                   | 15.7                    |  |
| F(1)                 | 0.6                    | 0.7                     |  |
| Fully collateralized | 48.0                   | _                       |  |
| Not rated            | 7.3                    | 8.5                     |  |
| Total                | \$ 359.3               | \$ 279.9                |  |

<sup>(1)</sup> The A.M. Best rating of "F" denotes liquidation. We have not reduced the carrying value of the recoverable from this particular reinsurer as a trust account exists to replace the potentially insufficient reserves.

## Item 4. Controls and Procedures

## **Evaluation of Disclosure Controls and Procedures**

The Company, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the design and operation of the Company's disclosure controls and procedures as of the end of the period of this report. Our management does not expect that our disclosure controls or our internal controls will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. As a result of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons or by collusion of two or more people. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. As a result of the inherent limitations in a cost-effective control system, misstatement due to error or fraud may occur and not be detected. Accordingly, our disclosure controls and procedures are designed to provide reasonable, not absolute, assurance that the disclosure requirements are met. Based on the evaluation of the disclosure controls and procedures, the Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures were effective in ensuring that information required to be disclosed in the reports filed or submitted to the Commission

under the Exchange Act by the Company is recorded, processed, summarized and reported in a timely fashion, and is accumulated and communicated to management, including the Company's Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

## **Changes in Internal Control over Financial Reporting**

The Company's management has performed an evaluation, with the participation of the Company's Chief Executive Officer and the Company's Chief Financial Officer, of changes in the Company's internal control over financial reporting that occurred during the quarter ended June 30, 2011. Based upon that evaluation, the Company's management is not aware of any change in its internal control over financial reporting that occurred during the quarter ended June 30, 2011 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

### **PART II**

## OTHER INFORMATION

# Item 1. Legal Proceedings

In common with the rest of the insurance and reinsurance industry, we are subject to litigation and arbitration in the ordinary course of our business. Such legal proceedings can arise from our underwriting or general business activities. The latter would include commercial contractual disputes or employment matters. Our Operating Subsidiaries are regularly engaged in the investigation, conduct and defense of disputes, or potential disputes, resulting from questions of insurance or reinsurance coverage or claims activities. Pursuant to our insurance and reinsurance arrangements, many of these disputes are resolved by arbitration or other forms of alternative dispute resolution. In some jurisdictions, noticeably the U.S., a failure to deal with such disputes or potential disputes in an appropriate manner could result in an award of "bad faith" punitive damages against our Operating Subsidiaries. Generally, our insurance operations are subject to greater frequency and diversity of claims and claims related litigation than our reinsurance operations and, in some jurisdictions, may subject to direct actions by allegedly injured persons or entities seeking damages from policy holders.

While any legal or arbitration proceedings contain an element of uncertainty, we do not believe that the eventual outcome of any specific litigation, arbitration or alternative dispute resolution proceedings to which we are currently a party will have a material adverse effect on the financial condition of our business as a whole.

## Item 1A. Risk Factors

There have been no significant changes in the Company's risk factors as discussed in the Company's Annual Report on Form 10-K for the year ended December 31, 2010. However, also please refer to the "Cautionary Statement Regarding Forward-Looking Statements" provided elsewhere in this report.

### Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

In connection with the options held by the Names' Trustee as described further in Note 12 to our financial statements, the Names' Trustee may exercise the options on a monthly basis. The options were exercised on a cash and cashless basis at the exercise price as described in Note 12 to our unaudited condensed consolidated financial statements. As a result, we issued the following unregistered shares to the Names' Trustee and its beneficiaries as described below.

|                |               | Number of Shares   | Total          |
|----------------|---------------|--------------------|----------------|
|                | Total         | Issued for Options | Purchase       |
|                | Number of     | Exercised on       | Price for Cash |
| Date Issued    | Shares Issued | Cash Basis         | Exercises      |
| April 15, 2011 | 41,184        | 11,801             | \$ 233,305     |
| May 16, 2011   | 19,475        | 1,077              | \$ 21,755      |
| June 15, 2011  | 11,801        | 6,477              | \$ 129,216     |

None of the transactions involved any underwriters, underwriting discounts or commissions, or any public offering and we believe that each transaction, if deemed to be a sale of a security, was exempt from the registration requirements of the Securities Act by virtue of Section 4(2) thereof or Regulation S for offerings of securities outside the United States. Such securities were restricted as to transfers and appropriate legends were affixed to the share certificates and instruments in such transactions.

In addition to the share repurchase program, we purchase shares offered from time to time by the Names' Trustee. On June 29, 2011, an agreement was signed to repurchase 254,107 shares from the Names' Trustee for a total consideration of \$6.4 million. The transaction has not yet been completed.

# Item 3. Defaults Upon Senior Securities

None.

# Item 5. Other Information

None.

# Item 6. Exhibits

(a) The following sets forth those exhibits filed pursuant to Item 601 of Regulation S-K:

## **CERTIFICATIONS**

- I, Christopher O'Kane, certify that:
  - 1. I have reviewed this quarterly report on Form 10-Q of Aspen Insurance Holdings Limited;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures as of the end of the period covered by this report based on such evaluation; and
  - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
  - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

# CERTIFICATION PURSUANT TO 18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with this quarterly report on Form 10-Q of Aspen Insurance Holdings Limited (the "Company") for the three months ended June 30, 2011 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), Christopher O'Kane as Chief Executive Officer of the Company and Richard Houghton as Chief Financial Officer, each hereby certifies, pursuant to 18 U.S.C. § 1350, as adopted pursuant to § 906 of the Sarbanes-Oxley Act of 2002, that:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
